

IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF PENNSYLVANIA

ACCU-SPEC ELECTRONIC
SERVICES, INC.,
Plaintiff

v. CIVIL ACTION NO. 03-394 ERIE

CENTRAL TRANSPORT
INTERNATIONAL, INC. and
LOGISTICS PLUS, INC.,
Defendants

JURY TRIAL - DAY NO. 1

Proceedings held before the HONORABLE

SEAN J. McLAUGHLIN, U.S. District Judge,

in Judge's Chambers & Courtroom C,

U.S. Courthouse, Erie, Pennsylvania,

on Monday, October 17, 2005.

APPEARANCES:

W. PATRICK DELANEY, Esquire, appearing on behalf
of the Plaintiff.

JEFFREY D. COHEN, Esquire, appearing on behalf

W. JOHN KNOX, Esquire, appearing on behalf of
Defendant Logistics Plus, Inc.

Ronald J. Bench, RMR - Official Court Reporter

2

3 (Whereupon, the proceedings began at 8:40 a.m., on

4 Monday, October 17, 2005, in Judge's Chambers.)

5

6 THE COURT: With respect to the voir dire, I've

7 reviewed it, it looks fine to me. Unless there are any serious

8 objections to any questions, I propose to ask each party's voir

9 dire. We don't have voir dire from you, do we, Mr. Knox?

10 MR. KNOX: No.

11 THE COURT: I think we have a number of legal issues

12 that need clearing up before we get going today. And before we

13 turn to the question of new versus used and Mr. Cohen's request

14 for a reconsideration, let me backtrack a little bit and flush

15 out exactly what the defense is here and what is going to be

16 admissible and what is not going to be admissible. Now, I'm

17 talking to Central Transport. Tell me if I have this right.

18 One of the defenses is going to be, for lack of a better term,

19 an improper packaging defense, is that right?

20 MR. COHEN: Yes, that's correct?

21 THE COURT: In other words, however this thing

22 should be put on or secured, it's their fault, not your fault?

23 MR. COHEN: That's correct.

24 THE COURT: You continue to press a fraud claim

25 here, a material misrepresentation claim, insofar as -- I'm

1 losing the term of art, is it rating?

2 MR. COHEN: Classification.

3 THE COURT: You talked about this at the pretrial
4 conference, I think you told me that was not a causative agent
5 in the damage?

6 MR. COHEN: It doesn't have to be causative -- first
7 of all, with respect to that --

8 THE COURT: Did you tell me that, Mr. Cohen?

9 MR. COHEN: The information, I read all the
10 deposition transcripts to this point --

11 THE COURT: Is my recollection correct, that is what
12 you told me at the pretrial conference?

13 MR. COHEN: I don't remember. With respect to the
14 classification issue and the connection to how freight would be
15 handled, that's not where the focus of the material
16 misrepresentation.

17 THE COURT: Where does it run to?

18 MR. COHEN: That runs directly to voidability of the
19 transportation agreement. Essentially, if false information is
20 provided in coming to an agreement, the Carmack Amendment --
21 borrows somewhat from contract law. It's not a contract, but
22 it borrows from contract law -- with respect to entering into a
23 contract. If materially false information is provided, that

24 provides that a contract can be voidable. The obligations --

25 THE COURT: In other words, it should have had a

5

1 rating of 100, if I understand your theory, rather than 50, is

2 that correct, given the nature of the freight?

3 MR. COHEN: Given the National Motor Freight

4 Classification, it should have had a classification of at least

5 100.

6 THE COURT: By virtue of assigning it 50, rather

7 than 100, how is Central damaged?

8 MR. COHEN: Central entered into a contract it never

9 would have entered into but for the material misrepresentation,

10 this never would have moved.

11 THE COURT: Forgive my ignorance of the freight

12 world, tell me why?

13 MR. COHEN: Why, Central Transport would not have

14 agreed to move class 100 freight at the freight rate provided.

15 This is a situation where Central Transport has to -- is a

16 company that moves freight. They have to cover themselves for

17 liability purposes. Valuation of freight and valuation is one

18 component of the classification system. It is a factor that
19 Central Transport must use in determining what rate to charge.
20 To cover themselves for taking on this additional liability.
21 If they're duped, for lack of a better term, it doesn't have to
22 be intentional, it could be a misrepresentation --

23 THE COURT: If they would have known what they were
24 doing, you said they wouldn't have done it at all. But if it
25 was classified as 100 rather than 50, would they have charged a

6

1 different rate?

2 MR. COHEN: Absolutely. Absolutely we would have
3 charged a different rate.

4 THE COURT: What do you have to say about this, Mr.
5 Delaney?

6 MR. DELANEY: First of all, I don't think it has any
7 relevance to the claim we're making. We don't know anything
8 about rates. We don't know anything about what transpired
9 between Logistics and Central. And contrary to some of the
10 suggestions by Central in their points for charge, Logistics is
11 not our agent. We don't control Logistics. We pay them a

12 price, they do what they have to do. They make the
13 arrangements they have to make. So I don't feel that it's,
14 first of all, relevant. Secondly, there's a disconnect here in
15 the sense the depositions reveal that no matter what the rate,
16 the responsibility for the care or the type of care that the
17 carrier uses in moving freight is the same. Third, I'm a bit
18 confused about the suggestion that this is Logistics duping
19 Central Transport. I understand that the rate, rate 50 versus
20 rate 100, has to do with the density of the goods that are
21 being shipped. There perhaps is a presumption that the more
22 dense, the less fragile and, therefore, we will charge less for
23 more dense, less fragile. This was, in fact, a very dense
24 piece of cargo. It took a great deal of force to cause the
25 damage that was caused. And I think that there's a disconnect

7

1 here. So for those reasons --

2 THE COURT: Excuse me, one second. What does the
3 record reflect was the genesis of or the origin of this 50;
4 wasn't there some familial relationship between someone from
5 Logistics and someone from Accu-Spec?

6 MR. DELANEY: Sure.

7 THE COURT: What about that?

8 MR. KNOX: There is no familial relationship with
9 Central Transport.

10 THE COURT: Why did they rate it 50 if it should
11 have been 100?

12 MR. KNOX: Our position, according to the testimony
13 of Mr. Fanzini, our representative, George Horetsky of Central
14 Transport suggested why don't we do it Class 50. There is a
15 conversation like, well, here's one rate -- which,
16 incidentally, Class 100, I think the difference is about 200
17 bucks. If they got a claim really for about 200 bucks, it's
18 not to void the contract.

19 MR. COHEN: It's likes telling an insurance company
20 you don't want the premium coverage, you want --

21 THE COURT: It's not like that, with all respect.

22 MR. KNOX: As to the issue of duping or material
23 misrepresentation, there is nothing false about the information
24 that we gave to Central Transport, it was in fact a crate.

25 THE COURT: When all is said and done, if it had

1 been 100, rather than 50, you would have charged a few hundred
2 bucks more for the shipment. That's one of the things that
3 would have happened?

4 MR. COHEN: That's definitely one, absolutely.

5 THE COURT: You would have made a little more money.

6 So one of the things that happened, I guess which inures to
7 their benefit, is by your lights they shipped a classification
8 100 piece of equipment on the cheap?

9 MR. COHEN: Yeah, that's right. That's absolutely
10 right. That hits it dead on.

11 THE COURT: Then if that's true, isn't your remedy
12 here today an additional claim against Logistics and/or
13 Accu-Spec for the difference in price between what you would
14 have charged and what you did?

15 MR. COHEN: Absolutely not. That absolutely is not
16 a remedy here. The remedy here is voiding the contract under
17 Restatement of Torts, under material misrepresentation or
18 fraudulent misrepresentation as defined by the case law, as
19 applied to this scenario. Not just simply extra dollars. That
20 would be putting the cart before the horse. Which would

21 encourage false classification throughout the industry until
22 they got cause, then you pay a couple hundred extra bucks, then
23 you're good to go.

24 MR. DELANEY: So it voids the contract, I'm not in
25 privity with him, I have a statutory right to recover the

9

1 amount of the damage. Secondly, he never pled fraud, that
2 other part. And, third, fraud requires justifiable reliance.
3 If there's an opportunity for you to discover the correct
4 information, then you're not justifiably reliant. They have
5 every right, on the part of the motor carrier, to open that
6 crate and look inside. And indeed they can.

7 THE COURT: Really, what we're talking about here to
8 a certain extent, there was a factual predicate established for
9 it, is a pure question of law, is the contract voidable. Did
10 you move for summary judgment on this?

11 MR. COHEN: We have not moved for summary judgment
12 on this issue.

13 THE COURT: Was it susceptible to summary judgment
14 as the record presently sets itself up?

15 MR. COHEN: The problem here is there is a question
16 of fact with respect to where the Class 50 came from. You
17 heard Logistics position, that's what Mr. Fanzini testified to
18 in his deposition. However, this whole issue rests on what Mr.
19 Horetsky is saying. Mr. Horetsky is the Central Transport
20 salesperson. He's the one that Logistics Plus dispatcher
21 called and they're the ones who communicated about this
22 freight. Mr. Fanzini says that Mr. Horetsky said let's do it
23 at Class 50. Mr. Horetsky completely says that that is
24 incorrect. Mr. Horetsky testified that Mr. Fanzini was asked
25 what freight classification. The genesis of this, originally

10

1 someone called for a spot rate. The spot rate does not require
2 a classification to be provided. That rate is necessarily
3 higher because you don't know the class, you have to cover
4 yourself to potential liability. That was the rate that was
5 brought back to Accu-Spec, as we're told through deposition
6 testimony. Then Logistics Plus comes back to Central and says
7 can you get me a better rate. Horetsky says okay, Chris
8 Fanzini what's the class. He says Class 50. Horetsky calls

9 the department in his company, says we have Class 50, origin,
10 destination. A rate is provided at Class 50 based on the
11 information provided by Logistics Plus.

12 THE COURT: What about Mr. Delaney's point that
13 whatever the legal effect on your contract with Logistics, it
14 doesn't affect his ability to recover?

15 MR. COHEN: In this case I believe his commentary
16 with respect to the agency issue is wrong.

17 THE COURT: Well, answer the first question, why is
18 Mr. Delaney's Carmack Amendment claim impacted by your
19 contention that Logistics did you wrong --

20 MR. COHEN: Accu-Spec basically stands in the shoes
21 of Logistics. By Logistics doing us wrong, Accu-Spec did us
22 wrong. It's the agents. Principals are bound by the acts of
23 the agent. As if Logistics was there telling us the wrong
24 class number. Their actions are the ones that caused this.

25 THE COURT: So, in essence, the legal principle

1 would be that the intentional misconduct in this case, what you
2 contend is the agent, is imputable to the principal?

3 MR. COHEN: It doesn't have to be intentional, it

4 could be careless and material. As long as it's a material

5 misrepresentation.

6 THE COURT: What about this, Mr. Delaney?

7 MR. DELANEY: Let's start with agency. In the

8 Restatement of Agency, Section 14(n), the commentary talks

9 about what is the difference between an independent contractor

10 and an agent. There are independent contractors who can be

11 agents if they have a fiduciary responsibility. People like

12 lawyers. I imagine someone who is contracted to pick up and

13 deliver a product to some other person. That person is an

14 independent contractor, there is no control over the manner in

15 which they accomplish the job. That's exactly the situation

16 here. That's law school principles. To be an agent, you have

17 to be under the control of a principal. We didn't know who the

18 trucker was, we didn't know what Logistics was doing.

19 Logistics didn't provide us with any paperwork. We didn't

20 expect to control it. I'd be very interested to understand how

21 it is with the lack of control that suddenly we are a

22 principal --

23 THE COURT: Is it in the amendment somewhere, where

24 it defines the legal relationship between a shipper and an

25 entity such as Logistics?

12

1 MR. COHEN: The basis of my argument is not with
2 respect to statute, but with respect to basic law on agency. I
3 have from the Pennsylvania Suggested Standard Civil Jury
4 Instructions -- Pennsylvania Suggested Standard Civil Jury
5 Instruction 4.00B, is the number 13 jury instruction request
6 submitted by Central.

7 THE COURT: What does it say?

8 MR. COHEN: It says "agency is a relationship that
9 is created when one party, called a principal, obtains another
10 party, called an agent, to perform services for him or her and
11 to act on his or her behalf, but subject to the principal's
12 right of control. A principal is bound by, and liable for, the
13 acts his or her agent does with actual or apparent authority
14 from the principal, and within the scope of the agent's
15 employment. an act is considered within the agent's authority
16 if:

17 (1) the principal granted express authority to
18 perform the act; or

19 (2) the act was proper, usual, and necessary to
20 exercise of the authority actually granted by the principal; or
21 (3) the principal's words or conduct would lead a
22 reasonably prudent person to believe that the principal has
23 granted the agent the authority to perform certain acts or if
24 the principal puts the agent into, or knowingly permits the
25 agent to occupy, a position in which, according to ordinary

13

1 experience and habits, it is usual for the agent to have
2 authority of a particular kind. In determining whether the
3 agent had apparent authority, you should look to the actions of
4 the principal, rather than the agent. However, a third party
5 is not entitled to rely on the apparent authority of the agent
6 if he or she has actual knowledge of the limitations of the
7 agent's authority or
8 (4) the principal knew or should have known that the
9 agent was exercising powers not granted to him or her but the
10 principal fails to take reasonable steps to notify others of
11 the limitations of the agent's authority, and a third party
12 justifiably changes his or her position based on his or her

13 reasonable belief that the agent possesses the authority."

14 We go on to say, "if you find that Logistics Plus
15 was acting within the scope of its authority with the
16 principal, Accu-Spec is bound by and liable for the acts of
17 Logistics plus."

18 THE COURT: One last question on this subject, then
19 I'm going to move on to some others. Who was it from Accu-Spec
20 that spoke with someone from Logistics about the rate?

21 MR. KNOX: George Horetsky. Jim Mullen.

22 MR. DELANEY: There's only a discussion between
23 Logistics and Central --

24 THE COURT: I misspoke.

25 MR. KNOX: I don't know that the record flushed out

14

1 that there was a discussion of rate --

2 THE COURT: Logistics and Central, is the way the
3 record is set up on rate discussion?

4 MR. COHEN: Class discussion.

5 MR. KNOX: There's clearly discussion on rate with
6 Accu-Spec and Logistics and Logistics and Central. I don't

7 think there's anything in the record that shows that there was
8 a discussion with Accu-Spec and Logistics --

9 THE COURT: Finally, on the subject of
10 misrepresentation, as you laid it out, would it be accurate to
11 say that in large measure the viability of that legal theory
12 turns upon the viability of your agency versus principal
13 theory -- as far as it would affect Accu-Spec's recovery?

14 MR. COHEN: I don't know that to be accurate.
15 Because Central only had contact with Logistics.

16 THE COURT: Let me see if I can ask the question
17 differently and maybe I can get an answer from you. If
18 Accu-Spec is not Logistics principal, do you have -- does your
19 fraud claim insulate you from Accu-Spec's claim?

20 MR. COHEN: Well, if Logistics wasn't the agent --

21 THE COURT: That's the flip side.

22 MR. COHEN: If Logistics wasn't the agent of
23 Accu-Spec, Accu-Spec would be the party entering into an
24 agreement with misrepresentation.

25 THE COURT: Let's go on to some other issues.

1 Besides the packaging defense and besides the issue we've just
2 discussed for sometime now with a misrepresentation defense,
3 what other substantive defenses to the claim does Central
4 intend to present?

5 MR. COHEN: The next one speaks to a 10 cents per
6 pound for used --

7 THE COURT: For the record, at our last get
8 together on the record I ruled on the issue of whether or not
9 this machine was used under the tariff. And concluded, for the
10 reasons I put on the record, that it was not. I received
11 subsequently a motion for reconsideration or clarification from
12 Central. The upshot essentially being that there may have been
13 a misunderstanding that it was not Mr. Cohen's intention to
14 stipulate, nor did he stipulate to the underlying predicate
15 facts upon which my opinion was based. And I went back and
16 took another look at that, and in fairness to Central and Mr.
17 Cohen, having read it carefully, I think that a reasonable
18 reader could reach that conclusion. That said, it begs this
19 question. What is the appropriate forum to resolve this issue
20 as to -- in other words, what is the appropriate forum to get
21 the facts on record that I had found had been stipulated to in

22 that hearing, i.e., is it a quick motion in limine with me or
23 is it an issue for the jury; that's my first question. Since
24 you had the motion there, Mr. Cohen, why don't you go ahead and
25 enlighten me on that?

16

1 MR. COHEN: Well, I guess the question -- they
2 blend, it's a mixed question.

3 THE COURT: Maybe I could advance all our causes by
4 asking you this. Do you have any evidence to the contrary?

5 MR. COHEN: Yes. The lawyers were doing a lot of
6 testifying at that hearing, with respect to hours of usage, the
7 lifetime of the machine. I was providing information about
8 discounts.

9 THE COURT: That's why I'm granting your motion for
10 reconsideration, I'm going to give you a chance to prove this
11 up one way or the other. To put a finer point on this, do you
12 have any evidence which would refute -- assuming that Mr.
13 Delaney has the evidence, do you have any evidence to refute
14 the contention that this thing has a natural life span of
15 something like 15,000 hours and was used less than 12?

16 MR. COHEN: In deposition of the Dage people on this

17 topic it was not flushed out. I had a conversation with

18 Dage --

19 THE COURT: I'm not talking about back then, I'm

20 talking about what's about to happen right here today. Is

21 Central in a position, assuming that Mr. Delaney puts on

22 proof -- you have the burden on this issue, by the way, to

23 establish that it was used -- do you have any competent

24 evidence where you can prove up anything one way or the other

25 as to the use of the machine, actual use of the machine or its

17

1 expected life use?

2 MR. COHEN: I anticipate testimony with respect to

3 the use of the machine. We talked about 12 hours. That could

4 be 12,000 X-rays. This information can come to the jury as

5 12,000 X-rays. It could be more than 12 hours. The life span,

6 it could be less. It could be more, I don't know. But we need

7 to flush that out, to get actual record evidence.

8 THE COURT: How would you propose we do it -- are

9 all your principals here that would be conversant on this point

10 this morning?

11 MR. DELANEY: The gentleman who would testify as to
12 usage is Joe Fisher. He's currently in Austin, Texas. We've
13 made arrangements to video conference him.

14 THE COURT: When would he be here?

15 MR. DELANEY: Tomorrow. Do you want me to offer
16 what he would say?

17 THE COURT: First of all, my first question is this.
18 It strikes me that this is a motion in limine kind of issue,
19 that I can do the fact finding if I have some facts in front of
20 me from some live people or witnesses or affidavits. And then
21 assuage Mr. Cohen's concern that he was being dragged into a
22 stipulation that he did not agree to. Does anyone disagree
23 that that is the appropriate mechanism to resolve this?

24 MR. COHEN: I think that we're here, we have a jury,
25 we're already going to have called witnesses today. I think

18

1 this question can just as easily go to the jury.

2 THE COURT: In other words, as the verdict form
3 would shape itself up, what would the jury be asked to find?

4 MR. COHEN: The jury would be asked -- the jury
5 would be asked to find is the machine new or used pursuant to
6 Central Transport's tariff. If it's used, it's \$528.

7 MR. DELANEY: That's an overarching issue that
8 doesn't apply to me. It applies to the relationship between
9 these parties. I'm not a principal of this party. I'm not in
10 privity with Central Transport, I have a statutory right to an
11 amount of money from them and/or from Logistics. So I don't
12 know anything about tariffs. And I don't know about limitation
13 of damages. And, in addition, the case law makes it clear
14 that, especially I think Third Circuit case law makes it clear
15 that the consumer must have been offered an opportunity of
16 different rates in order to trigger the limitation of damages
17 that are suggested by Central. Our testimony will be we got
18 one price, that was the price we accepted, and that was the end
19 of the discussion.

20 THE COURT: Are you saying as a matter of law a
21 shipper, such as you, is not bound by the tariff where there's
22 a middleman such as Logistics?

23 MR. DELANEY: We're not offered different rates for
24 different levels of liability or damage exposure by the
25 shipper, that's right.

1 THE COURT: We spent some time on this at the last
2 argument, given the way it turned out, I didn't have to rule on
3 it, do they have to offer different rates?

4 MR. COHEN: The shipper, per the law, they have to
5 provide different rates, sophistication, prior course of
6 dealings goes into that. In this case I went on for a very
7 long time about the tariff, how the tariff --

8 THE COURT: I went back and even rereading it, I was
9 hopelessly lost in the trees. Cut right to the chase.

10 MR. COHEN: The shipper is bound by the bill of
11 lading. The shipper is to familiarize himself with all the
12 terms and conditions of the bill of lading. The bill of lading
13 incorporates these other documents.

14 THE COURT: Did you ever get the bill of lading?

15 MR. DELANEY: No, it went from Logistics to Central.
16 When this was delivered to us, I believe that we were given a
17 bill of lading, I don't know if it's that particular bill of
18 lading from Logistics or there's one from Central Transport
19 after the equipment arrived.

20 THE COURT: How are they meaningfully given a choice
21 of freight rates then.

22 MR. COHEN: Accu-Spec?

23 THE COURT: Yes.

24 MR. COHEN: Accu-Spec relied on Logistics Plus to
25 communicate with Central Transport. Central Transport didn't

20

1 reach around Logistics to get to Accu-Spec.

2 MR. DELANEY: Judge, I have a suggestion. One thing
3 that could be dealt with here with the people that we have is
4 the issue of whether there is agency or not. I mean, Mr.
5 Mullen will be here this morning.

6 THE COURT: Let me ask you this on the question of
7 agency. It strikes me that there really isn't any dispute,
8 factual dispute, is there, as to the background relationship
9 here, why isn't this a pure question of law, what more do I
10 need to know -- Mr. Cohen put it his legal position, but the
11 actual relationship in the real world between these parties
12 against which I would judge the appropriateness of independent
13 contractor or principal, there's no real factual dispute, is

14 there?

15 MR. DELANEY: I don't believe there is.

16 THE COURT: There really isn't, is there, Mr. Cohen,
17 what am I going to hear from anybody beyond what I already
18 know?

19 MR. COHEN: What you know from the lawyers talking
20 or from depositions?

21 THE COURT: What would I hear from any of these
22 witnesses that I haven't already heard from you folks; in other
23 words, is there any disagreement on the facts that would form
24 the basis for my legal conclusion as to whether there's an
25 independent contractor status or principal status?

21

1 MR. COHEN: I don't think so.

2 THE COURT: What else, Mr. Delaney, anything else?

3 MR. DELANEY: Well, I'm sorry, I jumped ahead and
4 suggested that's a way to simplify things. I don't think that
5 there was anything else on the legal issues.

6 THE COURT: Insofar on this question of new versus
7 used, I am inclined, hearing no significant objection, I see no

8 significant problem with it. My view on this is we'll get out
9 of the blocks, I'm going to let people put in evidence on this
10 new versus used question out there. One of two things will
11 happen. Either there will be sufficient evidence to go to the
12 jury on the point or there won't. But I'm going to give you an
13 opportunity, since you have the burden of proof, to put some
14 evidence in on that. Of course, I suppose that begs the
15 underlying question as to whether the tariff is enforceable at
16 all as against Accu-Spec.

17 MR. COHEN: Your Honor, with respect to the sort of
18 our agreement that our argument today is all that you need to
19 hear with respect to agency. If that's going to be the case,
20 let me complete my argument respectfully if that's okay.

21 THE COURT: You can in a minute, hold your thought.
22 If your tariff new versus used business is not enforceable as
23 against Accu-Spec, is it of any moment to you, is it still an
24 important issue?

25 MR. COHEN: Well, that begs the question whether new

1 versus used is enforceable I believe against Logistics Plus.

2 THE COURT: That was my next question. How does it
3 benefit you if it does not impact Accu-Spec?

4 MR. COHEN: We believe that there is no way it can't
5 impact Accu-Spec. Accu-Spec can't avoid all written materials
6 governing transportation.

7 THE COURT: I understand your position, Mr. Cohen, I
8 truly do. I haven't ruled on that issue because it was
9 unnecessary for me the first time. My question is if you're
10 wrong on that point, does it in any sense materially still
11 inure to your benefit vis-a-vis Logistics?

12 MR. COHEN: I'm sorry, your Honor, I'm a little
13 confused on what your question is.

14 THE COURT: That's all right because I think I am,
15 too.

16 MR. DELANEY: I'm going to help Mr. Cohen here. The
17 statute does have a section about apportionment. I suppose
18 contractually there can be contractual apportionment, too.

19 THE COURT: Well, do you have any defense on this,
20 on the merits?

21 MR. KNOX: Yes.

22 THE COURT: What is it?

23 MR. KNOX: As you know, once they make their prima

24 facie case, the burden shifts to us to prove we were not

25 negligent --

23

1 THE COURT: That this was some kind of act of God?

2 MR. KNOX: Act of the shipper being the most

3 important one.

4 THE COURT: What are you going to try to prove up

5 insofar as Accu-Spec is concerned?

6 MR. KNOX: The act of the shipper here is their

7 failure to tell us that this was a valuable, \$120,000 machine.

8 And that omission caused this whole problem. Everybody took a

9 different position accordingly. That's not just some technical

10 argument, that is the whole shooting match.

11 THE COURT: In other words, you didn't know what you

12 were shipping, right?

13 MR. KNOX: Exactly. And the shipper, both Dage and

14 Accu-Spec, step in the shoes of the shipper -- there's

15 testimony that the truck driver, Dale Meabon and George

16 Horetsky, their belief is that the freight shifted in transit.

17 THE COURT: That's kind of tandem to what he's

18 saying about improper packaging.

19 MR. DELANEY: It's not fragile. It was marked

20 fragile with a wine glass on the side of the crate, it's not

21 fragile. It's 5,200 pounds of steel and lead. It was so

22 abused --

23 THE COURT: Why did they put a wine glass on the

24 crate?

25 MR. DELANEY: They dropped it so badly, that it took

24

1 the steel ledge or desk and bent it. They dropped it so badly,

2 that Dage said, for God sakes, don't turn it on, if they've

3 comprised the lead shield, you're going to get a lethal dose of

4 radiation.

5 THE COURT: All that having been said, there's

6 nothing wrong with him making the argument that you --

7 MR. DELANEY: If it had shifted.

8 THE COURT: That's fair game. I suppose it's fair

9 game if your position is that it was a fragile machine, you can

10 bark up that tree with the jury if you want to. You just put

11 on the proof you want to.

12 MR. DELANEY: Sure.

13 THE COURT: Anything else then?

14 MR. KNOX: Those are the two main points.

15 THE COURT: All right. Who do we have here today
16 that's going to get out of the blocks and testify?

17 MR. DELANEY: I have Ernie Carlson, who is the
18 president and one of the owners of Accu-Spec. And I have Jim
19 Mullen, who was an employee of Accu-Spec. He had interface
20 with Logistics. And then tomorrow I have Joe Fisher from Dage,
21 who was the supervisor of the California facility.

22 THE COURT: Would do you have, who do you have
23 witness wise?

24 MR. COHEN: We have three witnesses. We're going to
25 have George Horetsky, the salesperson. Jeff Cackowski and Dale

25

1 Meabon.

2 THE COURT: Okay. How about you?

3 MR. KNOX: Jim Berlin, the CEO of Logistics Plus,
4 and we have Chris Fanzini.

5 THE COURT: We'll finish this on Wednesday, is that

6 what everybody is thinking?

7 MR. DELANEY: Easily.

8 MR. KNOX: Yes.

9 MR. COHEN: If possible, with respect to Dale

10 Meabon. He's a truck driver. If he can go in the morning,

11 that is appreciated, he sort of losses money --

12 THE COURT: We'll do our best to try to accommodate

13 him under the circumstances. Is there anything else that needs

14 to be called to my attention?

15 MR. DELANEY: Just a couple of issues, we've talked

16 about the witnesses. I would intend to read into the record

17 pleadings. And in particular, a couple of paragraphs, three

18 paragraphs I think of the complaint, and three paragraphs of

19 Logistics answers where they admit that they're a freight

20 forwarder. There's also an admission in the pretrial narrative

21 statement of Logistics that this product, this package was not

22 damaged in California when it was turned over, in the process

23 of turning it over to Central Transport.

24 THE COURT: I'm sorry, from who?

25 MR. DELANEY: From Logistics. It's a statement in

1 the pretrial narrative statement, this product was not damaged
2 when it was turned over.

3 MR. COHEN: That's hearsay.

4 MR. KNOX: That's not an admission.

5 THE COURT: I'm not going to bind a client with a
6 legal representation by a lawyer in a narrative. Requests for
7 admission or something along those lines, yes.

8 MR. DELANEY: I have a series of cases, that include
9 the Western District of Pennsylvania, two cases out of the
10 Western District -- suggesting, however, even if it's not an
11 admission, it can be read to the jury, that they're bound by
12 that statement. That they're bound by the statements they made
13 in a pretrial narrative.

14 THE COURT: I'll look at the cases.

15 MR. COHEN: Just to make it clear, I don't know how,
16 this is a statement potentially made by Logistics Plus, how it
17 would potentially bind Central Transport as well, be used
18 against Central Transport. If I may, your Honor, what is the
19 statement?

20 MR. DELANEY: The statement is the package wasn't

21 damaged -- the product wasn't damaged in California --

22 MR. COHEN: That is complete hearsay, it can't bind

23 Central, Central didn't say it.

24 THE COURT: I didn't suggest it and I wouldn't --

25 MR. COHEN: There is no evidence to suggest it.

27

1 THE COURT: Don't look a gift horse -- you have a

2 very unfortunate habit of never knowing when good news is

3 coming down the track. When the wind is blowing in your

4 direction, be quiet. You wouldn't be bound by that no matter

5 how I rule on this, you couldn't be bound by this. What else,

6 Mr. Delaney?

7 MR. DELANEY: I have a package of two exhibits that

8 I want to put in. The last of which I think potentially is an

9 evidentiary issue or authentication issue. The last of which

10 is the straight bill of lading that was issued by Logistics,

11 that was signed by the Central Transport trucker on February 5,

12 2003. I received this when it was produced in response to a

13 request for production of documents. I just want to make sure

14 nobody is going to harp about being admissible.

15 MR. KNOX: No, I don't have any problem.

16 MR. COHEN: I should bring up we may introduce

17 Logistics Plus Web site.

18 THE COURT: Let's solve one thing at a time -- is

19 there any objection to what he just showed you?

20 MR. COHEN: No.

21 THE COURT: There is something that I forgot. I'll

22 think about these other questions and rule on them before we

23 get started. But we need to tell the jury a little bit what

24 this case is about.

25 MR. DELANEY: My suggestion would simply be that

28

1 they be told that it's a property damage case relating to a

2 piece of equipment that was being shipped across the country.

3 The plaintiff is the owner of the equipment and the defendants

4 are the parties who arranged for shipping, were transporting

5 the goods.

6 THE COURT: What I would propose to do is I would

7 propose to co-op in large measure Mr. Cohen's first paragraph,

8 and after the first paragraph simply say that Logistics Plus

9 and Central Transport contend that they are not responsible for
10 the damage allegedly sustained -- let me say that again,
11 Logisitics Plus and Central Transport contend that they are not
12 responsible for any damage to the X-ray machine.

13 MR. DELANEY: I respectfully suggest you avoid that.
14 We don't have to prove negligence. We don't have to prove any
15 of the detail that relates to the carriage of this.

16 THE COURT: It is their burden, once you've
17 established a prima facie case, to come forward, and that's
18 just another way of stating what they intend to prove by way of
19 their burden. They have to demonstrate by a preponderance of
20 the evidence that they weren't negligent and for some other
21 reason something else happened. So what's wrong with that, you
22 want me to tell the jury they admit they damaged the machine?

23 MR. DELANEY: I guess just the idea that they're
24 denying liability is all.

25 THE COURT: That's what I'm going to tell them.

1 MR. COHEN: Your Honor, there's one item that we
2 should address, I wanted to bring to your attention. Central

3 Transport objects to many of the proposed jury charge. I

4 presume you may want to address that at a different time?

5 THE COURT: Your presumption is correct. We're

6 going to have, it's my practice to kind of put together a draft

7 charge and we'll sit down and have a charge conference. It's

8 far too early in the game to do that right now.

9 MR. DELANEY: Also, on our schedule, judge, I had

10 scheduled the video conference of this gentleman in Texas, that

11 was going to occur at 1 o'clock our time tomorrow. I'm trying

12 to get him at 9:00 a.m. or about 9:15 tomorrow morning, so we

13 can just keep moving.

14 THE COURT: Where is he?

15 MR. DELANEY: He's from California, he's in Texas.

16 THE COURT: We're going to try to do him at 9:15?

17 MR. DELANEY: I hope to know this afternoon and I'll

18 let everyone know of course.

19 MR. COHEN: If I could bring up our exhibits, your

20 Honor. We may introduce the Logistics Plus Web site. It's

21 attached to Exhibit 1 on depositions, I'll give you guys a

22 copy, so you can have it in advance. And possibly with respect

23 to Dage, their trade show schedule. It's the current trade

24 show schedule.

25 MR. DELANEY: We know exactly what trade shows this

30

1 product went to. It went to one, if that's what you're

2 concerned about.

3 MR. COHEN: I'm just proposing this exhibit with

4 respect to trade shows.

5 THE COURT: What is the relevance?

6 MR. COHEN: This would show these machines travel to

7 trade shows when they're demos.

8 MR. DELANEY: We'll have the actual history of this

9 machine.

10 THE COURT: I'll withhold ruling on this until we

11 see a witness up on the stand, when he's going to use the

12 exhibit and question him about it, I don't have to do that

13 right now.

14 (Recess in Judge's Chambers from 9:25 a.m.; until

15 9:40 a.m.)

16 MR. KNOX: Judge, I went up to Attorney Delaney

17 beforehand to raise the issue about freight forwarder. We are

18 not going to be making an issue of this in terms of
19 distinguishing our status as freight forwarder versus -- he had
20 indicated to me, in light of that, perhaps he's not going to
21 address whatever portion of the pleadings he was going to read
22 on this issue. In turn, I merely mentioned what I may do is
23 read paragraph 12 of Accu-Spec's complaint, quote it in my
24 opening statement, that Accu-Spec believes Logisitics Plus
25 should have identified the X-ray machine as Class 100 cargo,

31

1 meaning cargo which was fragile and needed to be transported
2 with a higher degree of care than metal castings required.
3 I'm going to say that in conjunction with the Carmack
4 Amendment. That's their theory on why we should be held
5 liable.

6 MR. DELANEY: I said to him, first off, I don't
7 think it's a party admission the way it's phrased.

8 THE COURT: Where's it coming from?

9 MR. KNOX: Paragraph 12 of the complaint.

10 THE COURT: Your complaint?

11 MR. DELANEY: My complaint.

12 THE COURT: Why can't he read your complaint?

13 MR. DELANEY: I don't think it's a party admission
14 the way it's phrased, upon information, upon investigation or
15 something to that effect. In addition to that, it's not my
16 theory. I don't have any theory about fragile versus
17 non-fragile.

18 MR. KNOX: That was in the complaint.

19 THE COURT: I'm going to let you read it. You can't
20 try to disassociate, it's a pleading. Or bring in Mr.
21 Pendleton, see what he would say about it. Okay, now just to
22 clean up two other loose ends, then I'm going to get this jury
23 panel up here. On the question of misrepresentation, insofar
24 as it relates to Logistics, not Accu-Spec but Logistics, your
25 theory is that the misstatement was material and had you known

32

1 it, you would not have entered into the contract, is that
2 right, in essence?

3 MR. COHEN: Yes.

4 THE COURT: The theory being the contract, if you
5 accept the underlying facts, is voidable as a matter of law, is

6 that right?

7 MR. COHEN: That's true.

8 THE COURT: I'm going to rule on Accu-Spec in a
9 minute. I'm inclined to let you, the party having the burden
10 by clear and convincing evidence, to try to prove up this fraud
11 claim against Logistics. My only question is at the end of the
12 day, if I submit special interrogatories to the jury, with
13 respect to each, do you find that there was a material
14 misrepresentation made, for instance. Do you find that you
15 detrimentally relied upon. Isn't it a pure question of law for
16 me to declare -- in other words, what is a jury declaring a
17 contract void for, that's my province, that they do need to do
18 the underlying factual findings?

19 MR. COHEN: The jury needs to give those facts.

20 THE COURT: Then it would simply be a question, not
21 part of the jury's province, to declare the contract void?

22 MR. COHEN: I believe so.

23 THE COURT: Then what we're going to do is -- let me
24 clear this. Insofar as the issue on agency is concerned --
25 this is an order. After carefully considering the parties

1 arguments and, in particular, the fact there is the agreement
2 that there are no material facts in dispute insofar as it
3 relates to the relationship between Accu-Spec and Logistics,
4 I'm of the opinion that as a matter of law Logistics acted as
5 an independent contractor vis-a-vis Accu-Spec. And because
6 primarily, not necessarily exclusively, the record here
7 reflects that Accu-Spec exercised no control or dominion over
8 the manner in which Logistics performed its duties. The flip
9 side of that is that the record reflects that Logistics at all
10 material times had complete autonomy as to the manner or method
11 in which it would accomplish its purpose. Insofar as
12 Central's, one of Central's defenses being the question of
13 fraud, given my ruling on the lack of an agency relationship
14 vis-a-vis Logistics and Accu-Spec, any potential fraud does not
15 negate a claim by Accu-Spec. However, I'm going to permit
16 Central to introduce evidence to attempt to prove by clear and
17 convincing evidence its theory that it was duped into entering
18 into a contract with Logistics based upon Logistics
19 misrepresentations. It seems to me as a matter of law if
20 Central is successful in proving up that case, then liability,
21 if any, rests exclusively with Logistics. Because the contract

22 would have been voided and no further liability can run down
23 stream by way of contribution or indemnity. All right, let's
24 go.

25 (Recess in Judge's Chambers from 9:44 a.m.; until

34

1 12:00 p.m.)

2 THE COURT: Tell me what the cause issue is; first
3 of all, what's the juror's name and number we're talking about?

4 MR. DELANEY: Mary Lou Rosio, and she's number eight
5 I think in the pool sequence.

6 THE CLERK: Seat number 12 in the jury.

7 THE COURT: Mr. Paulis informs me that there is a
8 dispute on whether she should be dismissed for cause; what is
9 the issue?

10 MR. DELANEY: She works as a corporate buyer at
11 Snap-Tite. And Snap-Tite engages the services of Logistics
12 Plus. She sits next to, in her office sits next to the
13 representative of Logistics Plus on a daily basis and they have
14 some interaction. She also indicated that one of the officers
15 from Snap-Tite, I think she said went to work for Logistics

16 Plus. We followed up with a question about whether that would
17 affect her ability to be fair and impartial. Quite frankly,
18 she hesitated about that. And said I think I could be but, you
19 know, it might have --

20 THE COURT: Does Logistics Plus have a personal
21 representative at Snap-Tite's office?

22 MR. DELANEY: That's their business. If they can
23 get all the freight work for a corporation, they run the
24 shipping.

25 THE COURT: All right, bring her in chambers.

35

1 (Whereupon, Juror Mary Lou Rosio enters Judge's
2 Chambers.)

3 THE COURT: Would you be so kind as to indicate your
4 name and your juror number for the court reporter, please?

5 JUROR NO. 8: Mary Lou Rosio, juror number eight.

6 THE COURT: Now, I understand you would work at
7 Snap-Tite, is that right?

8 JUROR NO. 8: Yes.

9 THE COURT: Do I have it correct that you have a

10 person who sits next to you that works for Logistics?

11 JUROR NO. 8: Yes.

12 THE COURT: Who is that just for the record?

13 JUROR NO. 8: Stephen Adiska.

14 THE COURT: Are you friends or acquaintances,
15 obviously, acquaintances -- are you social friends with this
16 person?

17 JUROR NO. 8: We sit next to each other at work, we
18 socialize to a certain degree at work.

19 THE COURT: The critical question is this, since you
20 know Logistics is one of the parties to this case, let me just
21 put it right out for you. The question would be would you have
22 any hesitation, no matter how minimal, as to whether you could
23 be completely fair and impartial in this case, given the fact
24 that you apparently on a daily basis are closely associated
25 with an employee of Logistics?

36

1 JUROR NO. 8: Yes, I probably would.

2 THE COURT: Have some --

3 JUROR NO. 8: Have some difficulty.

4 THE COURT: I appreciate your candor. What I'm
5 going to do is I'm going to dismiss you. You haven't done
6 anything wrong, you've been very candid in your responses,
7 that's what we're looking for. All right, thank you.

8 (Juror excused from Judge's Chambers.)

9 THE COURT: I'm going to tell the jurors we're going
10 to take a break for lunch before we continue.

11 (Whereupon, the proceedings recessed at 12:05 p.m.,
12 in Judge's Chambers; and at 1:50 p.m., reconvened in
13 Courtroom C.)

14 THE COURT: Swear the jury, please.

15 THE CLERK: If you could please stand and raise your
16 right hands.

17 (Whereupon, the Jury was sworn.)

18 THE COURT: Members of the jury, now that you have
19 been sworn, I'll give you some preliminary instructions to
20 guide you in your participation in this case. Now, it's going
21 to be your duty to find from the evidence what the facts are.
22 You and you alone are the judges of the facts. You will then
23 have to apply those facts to the law as I give it to you. And
24 as I told you earlier this morning, you must follow the law

25 whether you agree with it or not. Nothing that I may say or do

37

1 during the course of this trial is intended to indicate or
2 should be taken by you as indicating what your verdict should
3 be.

4 Now, the evidence from which you will find the facts
5 will consist of the testimony of the witnesses, documents and
6 other things received into the record as exhibits. And any
7 facts the lawyers agree to or stipulate to or that I may
8 instruct you to find.

9 Now, certain things are not evidence and must not be
10 considered by you, and I will list them for you now.
11 Statements, arguments and questions by lawyers are not
12 evidence. Objections to questions are not evidence. Lawyers
13 have an obligation to their clients to make objections when
14 they believe that evidence is being offered for an improper
15 purpose under the rules of evidence. You should not be
16 influenced by the objection or by my ruling on it. If the
17 objection is sustained, ignore the question. If it is
18 overruled, please treat the answer like you would any other.

19 If you are instructed that some item of evidence is received
20 for a limited purpose only, then you must follow that
21 instruction. Testimony that the court has excluded or told you
22 to disregard is not evidence and must not be considered by you.
23 Anything that you may have seen or heard outside of the
24 courtroom is not evidence and must also be disregarded. You
25 are here to decide the case only on the evidence presented in

38

1 the courtroom.

2 Now, there are two types of evidence, direct and
3 circumstantial. Direct evidence is direct proof of a fact,
4 such as testimony of an eyewitness. Circumstantial evidence is
5 proof of facts from which you may infer or conclude that other
6 facts exist. Now, I'm going to give you instructions on these,
7 as well as other matters, at the conclusion of the case. But
8 for present purposes, simply bear in mind that you may consider
9 both types of evidence. It will be up to you to decide which
10 witnesses to believe, which witnesses not to believe, and how
11 much of any witness's testimony to accept or reject. I will
12 also give you some guidelines for determining the credibility

13 of witnesses at the end of the case.

14 Now, this is a civil case. Which means that the
15 plaintiff has the burden of proving its case by what is called
16 the preponderance of the evidence. That means that the
17 plaintiff has to produce evidence which, considered in light of
18 all the facts, leads you to believe that what the plaintiff
19 claims is more likely true than not. To put it differently, if
20 you were to put plaintiff's and defendant's evidence on
21 opposite sides of the scales, the plaintiff would have to make
22 the scales tip somewhat on his side. If the plaintiff fails to
23 meet this burden, the verdict must be for the defendant.

24 At the conclusion of the case I'm going to give you
25 some rather specific instructions on the burden and burden

39

1 shifting in this case. I'm not going to do it now, but you're
2 going to get further detailed instructions on the burden of
3 proof.

4 Now, those of you who may have sat on a criminal
5 case will have heard proof beyond a reasonable doubt. That
6 requirement does not apply to a civil case and, therefore, you

7 should put that out of your mind.

8 A few words about your conduct as jurors. First, I
9 instruct you that during the trial, as I told you earlier
10 today, you're not to discuss the case with anyone or permit
11 anyone to discuss it with you.

12 Second, do not read or listen to anything touching
13 on this case in any way.

14 Third, don't try to do any independent research or
15 undertake any investigation about the case on your own.

16 And, finally, do not form any opinion until all the
17 evidence is in. That is to say, it's very important you keep
18 an open mind until the conclusion of the case.

19 If you wish, you may take notes. And I will see to
20 it that you are supplied with legal pads and pens for that
21 purpose. If you do decide to do that, I would ask that you
22 leave them in the jury room each night and remember that they
23 are really only for your own personal use.

24 Now, the trial is about to begin. First, each side
25 may make an opening statement. Remember that an opening

1 statement is neither evidence nor argument. It's simply an
2 outline of what that party intends to prove offered to help you
3 follow the evidence. Next, the plaintiff will present its
4 witnesses and the defendants may cross-examine them. Then the
5 defendants will present their witnesses and the plaintiff may
6 cross-examine them. After that, the attorneys will make their
7 closing arguments to summarize and interpret the evidence for
8 you. And thereafter that I will give you my instructions on
9 the law.

10 Mr. Delaney, are you ready to go?

11 MR. DELANEY: I am, your Honor. May it please the
12 court, good afternoon, folks. I was introduced to you earlier,
13 but I'm sure you don't remember who I am. My name is Patrick
14 Delaney, and I'm here on behalf of the plaintiff in this case.
15 And that's a company, a company by the name of Accu-Spec. With
16 me at the table is Ernie Carlson. Mr. Carlson is one of the
17 owners of Accu-Spec, and an officer of the company.

18 This case involves events that occurred back in
19 2003. And at that point in time Accu-Spec was employing
20 about -- I'd say about 100 people, out in McKean, towards
21 Edinboro. And they are in the business of making components
22 for electronic equipment. Things like MRI machines. They make

23 circuits boards, do the assembling. They construct circuit
24 boards. Not very big items, maybe the biggest might be 20 by
25 20 inches.

41

1 And back in 2002, they decided that they would like
2 to make an investment in better quality control in their
3 company. So they decided to buy an X-ray machine. But not the
4 kind of X-ray machine that you have in a hospital, an
5 industrial X-ray machine. Essentially, it would allow the
6 quality control people to look at the work that had been
7 performed at Accu-Spec to make sure it was done well.

8 So Ernie Carlson will testify in this case. He'll
9 tell you that sometime in 2002 they began to look around to
10 where they could buy this kind of a machine. They went to a
11 trade show in Chicago. And they met some people from a company
12 by the name of Dage, D-a-g-e. Dage is a company from the
13 United Kingdom and they manufacture these X-ray machines.

14 So Mr. Carlson and other people from Accu-Spec began
15 to talk to Dage, and decided that they had the type of machine
16 that they wanted to buy. So they got a quote. This machine is

17 not cheap, it was about \$135,000, for a new machine. They

18 began to dicker or negotiate with regard to the price.

19 And the salespeople from Dage said look, we can get

20 down to \$120,000. We have a machine that is out in California,

21 we have a facility in California, the people from Dage said,

22 and that is used to show customers how the machine works. So

23 they said it was a demo of sorts. I think you'll hear that the

24 machine was only a matter of months old at the point in time

25 when we agreed, we at Accu-Spec agreed to buy it. But we

42

1 reached a price of \$120,000.

2 As part of that transaction, Accu-Spec was to

3 arrange the shipment from California to Pennsylvania, to Erie,

4 Pennsylvania, to McKean, Pennsylvania. Mr. Carlson will tell

5 you that what he did is he went to one of his employees, Jim

6 Mullen. Mr. Mullen is in the courtroom, he'll testify here.

7 He went to Mr. Mullen and said look, work on this, make the

8 arrangements for shipping.

9 Mr. Mullen will tell you, and Mr. Carlson will say

10 the same thing, that while Accu-Spec ships products all the

11 time, it's usually via UPS. This X-ray machine is a big piece
12 of equipment and required a motor carrier, a trucking company,
13 essentially.

14 What Jim Mullen did, though, instead of going to a
15 trucking company and getting any kind of a quote, he went to a
16 company locally by the name of Logistics Plus. And they're one
17 of the defendants in this case. Logistics Plus is a freight
18 forwarder. They don't handle the product. You pay them your
19 money, they take care of all of the arrangements. They hire a
20 trucking company. And they pay the trucking company. And they
21 take care, as the name implies, the logistics of the
22 transporting.

23 So Jim Mullen, and it's interesting, Jim Mullen's
24 son-in-law worked for Logistics Plus. He called his son-in-law
25 and said look, I got this piece of equipment that needs to come

1 from California. So Logistics Plus was happy to do this.

2 What information did they exchange. Mr. Mullen will
3 tell you that he told the people at Logistics Plus we need a
4 piece of equipment sent across the country, it weighs a lot.

5 This is not a small box, it's a crate. And I think you'll hear
6 that the crate is perhaps eight-feet tall, six-feet wide and
7 six-feet deep. It weighs more than two tons, 5,200 and
8 some-odd pounds.

9 So he told him that information. He told the people
10 at Logistics Plus that information. He told him where it
11 needed to be picked up. It needed to be picked up at the Dage
12 facility in Fremont, California, which is near
13 San Francisco. He told them when they needed it in Erie, when
14 they needed it in McKean, Pennsylvania. And that would have
15 been February 14, 2003. That's when they needed the shipment
16 to come in.

17 Logistics Plus gives a price. And the people at
18 Accu-Spec said fine, that price is good. Logistics Plus talks
19 to a trucking company, Central Transport. We don't know that
20 at Accu-Spec, they do that work. They make arrangements with
21 Central Transport to pick this piece of equipment up. It's
22 going to be picked up, I think February 5, 2003. They tell
23 them we need it shipped to Pennsylvania, it has got to arrive
24 here on February 14th. All right. Central Transport takes on
25 that job.

1 We don't receive any kind of paperwork, all we know
2 is it's going to cost us X dollars. It's going to cost us
3 about \$600 for the shipping. We don't have any direct contact
4 with the people at Central Transport.

5 Here's another thing. You'll hear about a truck
6 picking up this piece of equipment in the San Francisco area.
7 It's not the same truck that delivers it here in Pennsylvania.
8 It goes through a series of vehicles apparently to get here.
9 You'll hear I think the driver that delivered the machine on
10 February 14th. He isn't the same driver that's out in
11 California on the 14th, or on the 5th of February. So there's
12 a series of stops and changing of vehicles and that sort of
13 thing.

14 So let me take you now to February 5, 2003. At the
15 Dage facility out in California, they have crated this piece of
16 equipment. Inside the crate, I think I told you the crate
17 itself is perhaps eight-feet tall. This machine, and you're
18 going to see pictures of it, this machine looks like it's six
19 or seven-feet tall, maybe six-feet wide and deep.

20 The machine is in a crate, it's a box, a wooden box,
21 that is bolted together. They literally use what I call a lag
22 bolt, it's got a bolt and a nut that goes through openings in
23 the wood, that ties this crate together and that's how they
24 ship it. It is snug, there is no wiggle room inside this
25 crate. That may become important as you listen to this case.

45

1 It has a floor, the crate has a floor. So it isn't
2 just a machine on the ground. It is not locked or sealed.
3 There is no shrink wraparound on the outside of the box. There
4 is no lock device on any of the bolts. You'll hear that if you
5 have a wrench and five minutes, you can open one of the panels
6 and look inside if you want to look inside.

7 There will be, as I said, there will be testimony
8 that this crate is very substantial, it is built with
9 four-by-fours, two-by-four pieces of lumber, and you'll see
10 some pictures of it. So you'll see it's a very substantial
11 piece of packaging. And, again, the machine is extremely snug
12 inside. You have a 5,200 pound piece of equipment on the
13 inside, it's not going to flop around on the inside.

14 Now, we don't know what happens between February 5th
15 and February 14th. The next piece of the story that we know is
16 that we understand the machine is to arrive at McKean on
17 February 14th. Ernie Carlson is at the plant, Jim Mullen is at
18 the plant, and the truck from Central Transport arrives that
19 morning.

20 That's the first time we know anything about Central
21 Transport. We don't know who the trucker is. But it arrives
22 at our facility in McKean. They're going to unload this piece
23 of equipment and put it in the plant. Now, Accu-Spec, they
24 don't move this kind of equipment commonly. So they have hired
25 a rigger, that is a contractor who's going to come in with a

46

1 great big forklift and unload the truck, and then move the
2 piece of equipment into the plant. The rigger is there, they
3 made arrangements for the rigger to be there. They're going to
4 unload it right on to the parking lot, not on to a dock, but on
5 to the parking lot uncrated, and then move the equipment in.

6 So it arrives. Jim Mullen is there, Ernie Carlson
7 is there. When they open the doors of the tractor-trailer, and

8 it's a box-type trailer, this piece of equipment, this crate is
9 occupying virtually the entire back of the truck, from side to
10 side. There's maybe a little bit of room, those
11 tractor-trailers are usually 90 or maybe 102 inches wide. But
12 it occupies right at the back end a very large portion.

13 And I think Mr. Mullen and Mr. Carlson will tell you
14 that they saw something in the corner, the back portion of the
15 crate that they could see looked okay, but in the corner they
16 saw something odd, they didn't know what it was, it looked like
17 a mark of some sort. When the forklift goes up and brings this
18 box out, they see what appears to be a puncture hole in the
19 side of the crate. And you'll see a picture of that.

20 Now, the forklift is bringing this crate down to the
21 ground and they have a chance to look at it. And they go
22 around to the side, that was on the inside of the truck. And
23 they see that the wall of the crate has broken out. That the
24 wall of the crate is cracked, so you can actually see inside
25 the crate. They look at the lower edge on that side, and you

1 can see that the wood has broken away. And they look at the

2 bottom of the crate and you can see that that piece of
3 equipment, the legs, the legs are very small, they're more like
4 levelers, the leg is smashed through the bottom of that crate.
5 Now, they'll tell you if you're just a person
6 observing that damage, it's very obvious this thing was
7 dropped. This 5,200 pound piece of equipment was dropped, what
8 appears to be on the front edge of the crate. Throwing the
9 weight forward and causing this crack in the front panel of the
10 crate. So they get it on the ground.

11 The truck driver hands Jim Mullen a receipt. And
12 Jim said he signs it, as Ernie Carlson is going back into the
13 plant to get a digital camera, to take pictures of the damage.
14 When Ernie comes back out, the crate, of course, is still
15 there, the truck driver is on his way down the road. And Ernie
16 says oh, my God, you let the truck driver go, we need to get
17 that receipt, mark something on that receipt. No problem, they
18 immediately get on the phone and they call Logistics Plus.
19 Because they haven't had any contact with the trucking company.

20 They call Logistics Plus and say look, there is a
21 problem, we got damage on this crate, we don't know what the
22 damage might be on the inside, we need somebody out here to
23 inspect it. Later that day, and recollections are a little

24 poor, it might have been within an hour, a representative of
25 Central Transport comes back to Accu-Spec and looks at the

48

1 crate. And they actually now unbolt some of the fasteners on
2 the crate and open it up to look inside.

3 And what they see and you will be able to visualize
4 this better when you see the pictures, there is a shelf where
5 the operator has a keyboard on the front of this device, that
6 shelf has pushed through the crate. That shelf, and we're not
7 talking about something that can't withstand some force, we're
8 talking about a steel shelf on this X-ray machine. That shelf
9 has bent. There's portions on the bottom of the shelf that
10 have bent. It has been subjected to a very substantial force.

11 At any rate, they're able to look inside and they
12 see that there's a problem, there's damage with the cargo
13 itself. They close it back up. The man from Central Transport
14 authorizes a truck to come back -- we have the rigger there,
15 put the cargo back on a truck, and Central Transport takes the
16 cargo to a warehouse that is owned by Logistics Plus here in
17 Erie County, I can't tell you where the warehouse was. And it

18 sits there.

19 Now, at the same time, that same day, February 14th,
20 we're getting ahold of Dage, also. We've got the digital
21 photographs, opened the crate a little bit, took some digital
22 photos of the machine itself, and we e-mailed those out to the
23 people in California. And you'll see a series of e-mails.

24 What Dage said to us was don't turn the machine on.
25 It has radiation, it's an X-ray machine, it's lead lined. From

49

1 the pictures it's very possible that the lead lining has been
2 compromised. If you try to turn it on, you're going to get a
3 lethal blast of radiation. Okay. Actually, Jim Mullen sent
4 back an e-mail that you'll see, that said okay, is it just okay
5 to sit there. They said yeah, it's okay just to sit there,
6 just don't turn it on.

7 What do we do. They said you need to get an
8 engineer from Dage out of England, out of the United Kingdom,
9 to come over and look at it.

10 So now we have a piece of equipment that we paid
11 \$120,000 for and it's sitting in a warehouse. We have to

12 wait for a man to come from England, an engineer. He arrives
13 in April of 2003. He looks at it, a guy by the name of Peter
14 Dunn, looks it over and hands us a report. And that report
15 said you need to send this machine back to England to be tested
16 and repaired. You can't turn it on, other than in a controlled
17 environment. And they have to take a Geiger counter, to go
18 over it, the explanation is, to see if there's a leak of
19 radiation. So that's what we do.

20 We bring another company in, whose bills you will
21 see, to re-crate, re-package the piece of equipment, the X-ray
22 machine, and we send it back to England.

23 Now, it's August of 2003. They test it, they repair
24 it, and they send it back to us. It's got to go on an ocean
25 freighter. They send it back to us. And it comes back to us,

50

1 I think it's about October of 2003. And it works. And it
2 works today.

3 So all of the costs that we incurred with regard to
4 this inspection and repair, that's the claim we're making here
5 today. It cost us \$47,512.84 to get the inspector here, to

6 have the inspection done, to ship it back to England, to have
7 it repaired. The repair itself was \$36,000. To ship it back
8 to the United States, we had to pay almost \$800 in customs to
9 get it back into the United States, to get it back to our
10 plant. That's the nature, the type of claim that we are making
11 in this particular case.

12 Now, how is it that with a claim like this you get
13 into the United States District Court. Sounds like a run of
14 the mill dispute that we might end up in state court. Well,
15 we're in federal court because there's a federal law that
16 applies. There's a federal law, it's just about 100-years-old
17 now, you might hear it referred to as the Carmack Amendment.
18 It's not terribly important to remember that. But there's a
19 federal law that determines the relationship between people in
20 interstate commerce, in interstate transportation. The Carmack
21 Amendment identifies certain people.

22 A shipper, we're the shipper. Sometimes you might
23 hear us called or see a document saying we're the consignee,
24 same thing. We're a shipper.

25 There is a freight forwarder. That's Logistics

1 Plus. They don't handle the freight, they make all the
2 arrangements.

3 And then there's a motor carrier. And that is
4 Central Transport.

5 And that law, you will hear, indicates that when you
6 deliver goods to the motor carrier in good condition, and they
7 arrive at their destination in a damaged condition, the freight
8 forwarder has to pay the actual damage. The motor carrier
9 equally has to pay the actual damage. Not twice, but both of
10 them are responsible. If the freight forwarder, Logistics, pays
11 for the loss, they can turn around and find out where the loss
12 occurred, in what part of the trip that the loss occurred. But
13 this law relieves us, the shipper, of that obligation. Because
14 we don't know anything about it.

15 It also relieves us of having to show that anyone
16 was careless. We don't have to show that someone was
17 negligent, we don't have to show that someone intentionally
18 damaged this. We don't have to show that it was dropped.
19 Although, you will, I believe, find that it obviously was.
20 They're supposed to pay for our loss and then sort it out

21 amongst themselves.

22 We made a claim to Central Transport and Logistics.

23 We sent a letter to them right after this damage became

24 apparent in February of '03. We said look, here's our

25 situation. We don't know the money amount yet, but here's our

52

1 situation. We got no response. Then we got a response saying

2 well, you didn't fill in our form. So we filled out Central

3 Transport's form. And then they sent us a letter, you'll see

4 this, this is wonderful, they send us a letter that said

5 denied. We got a receipt that says there's no problem. So I

6 don't know what your problem is, it's denied.

7 So that's the treatment we have had over the last

8 two years, two-and-a-half years. And we're out of pocket

9 \$47,000.

10 We have three witnesses for you. I'm going to have

11 Ernie Carlson testify. He'll tell you what he remembers from

12 these events. Jim Mullen will testify and tell us what he

13 recalls.

14 Then tomorrow what I hope to have, technology

15 dependent here, we hope to have by video conference, by
16 satellite I guess it is, to have on these screens, a
17 representative from Dage, who is out of California, but is
18 currently in Austin, Texas, on a job. He has told us he will
19 go to a video conferencing facility to be available. We hope
20 to have him testify as well about generally the crating. This
21 crating, he will tell you, this crate that was used to package
22 the equipment and send it to us here in Erie, is the same crate
23 that was used to send the machine from England to California
24 beforehand. It's a special crate, well built.

25 We have a number of exhibits for you to look at.

53

1 A lot of pictures. Probably a dozen or more pictures. But I
2 hope that we will do this very efficiently. We understand that
3 this is an inconvenience to you. It's been an inconvenience to
4 us as well. But we'll try to do it very efficiently, get the
5 information to you rapidly and hopefully have you out of here
6 soon. We thank you very much for your attention.

7 THE COURT: Mr. Cohen.

8 MR. COHEN: Thank you, your Honor. Good afternoon,

9 thank you very much for your service, it's appreciated. We

10 appreciate you spending time here to fulfill this service.

11 My name is Jeff Cohen, I'm the attorney who

12 represents Central Transport, the trucking company in this

13 case. Sitting with me today is Mr. George Horetsky. He's

14 going to be an important witness who will testify in the trial.

15 He actually is the salesperson who arranged for the

16 transportation with Logistics Plus.

17 This is one of these transportation cases where

18 there's multiple parties in the chain, so it's easy to get

19 confused with this stuff. So, essentially, it's because

20 there's a middleman. And the middleman is Logistics Plus.

21 Accu-Spec yes, they are the shipper. They wanted

22 the freight to be moved from California to Pennsylvania. They

23 arranged for this to happen. But as counsel said, they didn't

24 call up Central Transport, the trucking company. They could

25 have, they could have called Yellow Freight, Roadway, but they

1 chose to go through a facilitator, Logistics Plus. It's a

2 transportation logistics company. That's what they do, they

3 have a 100 trucking companies, they broker, they pick the
4 trucking company that has the best rates or best whatever for
5 their customer.

6 So Accu-Spec calls up this transportation broker or
7 freight forwarder, these terms will come at you, it's the
8 middleman. And they in turn pick up the phone and call the
9 truck, Central Transport.

10 Now, the problem comes here in what happened when
11 Logistics Plus got the information from Accu-Spec, and then
12 conveyed the information to Central Transport. Really, what it
13 boils down to, I've been thinking about it, what it boils down
14 to, is this case is really about broken trust, that's what it's
15 about. It's about broken trust. There are these agreements
16 which take place in the transportation industry. And one
17 vendor trusts the other.

18 In this case Accu-Spec, the company that wanted the
19 big old machine moved, they trusted Logistics Plus to do a
20 particular function, to do a job. Their job, although it
21 sounds pretty simple, you have to do it right. They wanted
22 Logistics Plus, call me a truck and get me a good rate, pretty
23 much. Protect my interests effectively, make sure you get me a
24 good truck, that's going to get it there, it will be there when

25 I want it. So Accu-Spec trusts Logistics to do that.

55

1 Central Transport, the trucking company, also trusts
2 Logistics Plus. Central Transport trusts Logistics Plus to
3 give them information about the freight that was accurate.
4 Okay. Because Central Transport, they're not a volunteer
5 company, they work for profit, like all these companies. So to
6 ship the freight properly and to enter into an agreement which
7 is truthful, they needed truthful information and accurate
8 information.

9 Logistics Plus failed on both accounts. They
10 breached their trust to Accu-Spec, they breached their trust to
11 Central Transport. How did they do this. Why am I pointing
12 the finger at Logistics Plus like this. It's because of one
13 central factor with respect to how the information that was
14 conveyed.

15 With the court's permission, I'm going to put one of
16 the pre-approved exhibits up on the monitor for the jury.
17 Okay. This document that you're looking at right now is called
18 a bill of lading. This transportation doesn't happen in a

19 vacuum. There are agreements. You would imagine there would
20 be agreements, these companies aren't going to do business on a
21 handshake.

22 So what happened in this case is that Logistics
23 Plus, the freight forwarder, they put together a document called
24 the bill of lading. You're looking at the bill of lading.
25 You'll hear bill of lading a lot, it's really a contract. On

56

1 the bill of lading there's a description, right where that
2 arrow is -- for classification. Okay. So as you can see on
3 the bill of lading, this X-ray machine thing was described only
4 as a crate --

5 THE COURT: Excuse me, see if you can zoom in on
6 that, focus that -- Mike, maybe you can help him.

7 MR. COHEN: Thank you, your Honor. In this document
8 you can see on the left -- and this document was filled out by
9 Logistics Plus. They only described the property as a crate.
10 They didn't say X-ray machine. They didn't say \$135,000
11 sophisticated X-ray machine. They called it a crate.

12 And what they also did, which was very important, is

13 over here on this side there's something called class/rate.

14 And they put a 50 in there. Why is that so important. That's

15 important because that's the number that the trucking company

16 uses to determine how much to charge them. There will be

17 substantial testimony about how that all works.

18 So really what happened here is the logistics

19 company, Logistics Plus, provided information to Central

20 Transport which was incorrect. Now, that Class 50 is wrong.

21 There are people in this case. They're going to get

22 up and testify on that stand. You are going to have to judge

23 their credibility. Ultimately, that's many of these cases come

24 down to that. You're going to have to believe one person over

25 another person. Sorry to put you in that position, but that's

57

1 what your job is.

2 We're going to have testimony, probably tomorrow, of

3 George Horetsky, who's sitting right there. He's going to sit

4 up there and he's going to testify about what communications he

5 had with Logistics Plus when making arrangements to transport

6 the freight. Mr. Horetsky is going to testify that originally

7 he gave a price quote to Chris Fanzini, he's the dispatcher
8 from Logistics Plus. He originally gave him a quote to move
9 the freight. The dollar amount was determined to be too high
10 and the Logistics Plus representative, Chris Fanzini, said can
11 you get me a better rate. Remember, Chris Fanzini is moving
12 the freight for his father-in-law, let's understand the
13 relationship here. There's incentives and biases, you'll have
14 to generate and use to determine credibility.

15 So George Horetsky is going to testify that
16 subsequent to that, after Mr. Fanzini says can you get me a
17 better rate, George says well, what's the class. That's the
18 question in the transportation industry, what's the class.
19 Mr. Fanzini told George it's Class 50. Class 50 is the lowest
20 classification. Classifications are numbers which are assigned
21 to freight, everything from evergreens to apples. To cement,
22 to tile, to nuts and bolts, has a number, in this book, it's
23 this thick, (indicating). All the trucking companies and all
24 the transportation companies use it.

25 Class 50 is cement. It's tile. It's dense, heavy

1 things that are of low value. This was a sophisticated X-ray
2 machine, Mr. Fanzini said Class 50. That was wrong.
3 So George has to call somebody to get a rate. He's
4 the sales guy, he has to call somebody else to get the rate.
5 He needs the class. So he calls to headquarters, he says hey,
6 I got a piece, he didn't know it was a machine, he knew it was
7 a crate. I have a crate, it's this big, it's going from here
8 to there and it's Class 50. They give him a rate, it's
9 communicated to Logistics Plus. And, of course, Logistics is
10 the middleman, so then it goes to Accu-Spec.

11 That's what the rate was based on, it was based on
12 Class 50. When in truth, and I will show you documents and
13 there will be testimony it should have been classed at 100.
14 The difference of freight rate isn't that much, however, it
15 makes the contract a lie, really. You can't go into an
16 agreement and give false information and then turn around and
17 say pay me full value for my damage. It doesn't work that way.

18 So while counsel for the plaintiff is correct in
19 asserting that there is this law out there that says that a
20 shipper is entitled to seek recovery from freight forwarders
21 and carriers, there's also another law out there that says you

22 can't lie to the people or misrepresent to people and expect to

23 get full coverage.

24 So this will be for you to decide. Two people will

25 sit there and there going to say different things. Mr. Fanzini

59

1 is going to say that George Horetsky said -- he said, Chris,

2 let's just make it Class 50. That's different than what George

3 is going to say. You're going to have to look at these people

4 and figure out who is credible. We're confident that you'll

5 determine that Mr. Horetsky is telling the truth when you look

6 at the complete picture here.

7 So that's one issue in this case. There's another

8 thing that Logistics Plus did wrong. And this deals again with

9 the paperwork, moving of the freight. This document you're

10 looking at here, this bill of lading, this contract, has in the

11 top part and the printing is not very clear on this version, we

12 can get it clearer, it basically says -- you can see right over

13 here, the shipper certifies that he is familiar with all the

14 terms and classifications on the bill of lading -- I can't even

15 read it myself, subject to the classification and tariffs in

16 effect at the time the shipment is made. Very unclear version,

17 not a good example. But this bill of lading that was prepared

18 by Logistics Plus, incorporated what's called a tariff.

19 Central Transport has a book. This cargo doesn't

20 move in a vacuum. As you can imagine, these trucking

21 companies, they have documents in which they try to protect

22 themselves. They try to lower the liability as low as possible

23 so they can give the buying public the lowest rates possible,

24 just like any company. They have to manage their risk.

25 In this case there was a limitation of liability for

60

1 this type of freight. The problem is nobody told Central

2 Transport what type of freight it was. And that is used

3 machinery. There's going to be, there's another interesting

4 thing that you're going to have to do. There's a little bit of

5 semantics game, a game dealing with this language here about

6 what is used.

7 You've heard testimony that the X-ray machine was a

8 demo model. Okay. Many hours have been spent evaluating what

9 a demo model is. Is it used, is it new. Well, there's going

10 to be testimony, coming right from that stand, maybe from the
11 video, probably from the video from the gentleman in Texas, as
12 to what this machine was. How long was it on the demo floor in
13 California, that's where it came from. How many X-rays did it
14 take. How many hours was it operating. How much of a discount
15 did Accu-Spec get for this thing. I mean, if you get a
16 discount, we're going to argue it's not new. If it's going to
17 take a 100 X-rays, a 1,000 X-rays, we don't think it's new. It
18 will be for you to determine what's new, what's used.

19 And the reason that becomes important, ladies and
20 gentlemen, is because in the trucking companies, this is in
21 Central Transport's rules, it says if you're moving used
22 equipment, you're limiting your liability to 10 cents per
23 pound. That's low. That is something Logistics Plus, as the
24 sophisticated international logistics company, should have
25 known, because they should have looked at it, number one.

61

1 Number two, if they're doing their job, not
2 breaching trust, they should have told Accu-Spec about it. So
3 they knew. Well, do we really want to ship this \$135,000

4 machine for 10 cents per pound liability. The answer I'm sure

5 would have been no, I don't want to do that. Charge me a

6 higher rate. I want to protect it.

7 So there are these two factors. There is a breach

8 of trust in misclassifying freight, Logisitics Plus did, which

9 leaves the burden then on them for the damages to the machine,

10 not Central Transport. We would have never entered into the

11 agreement if we had known we had been lied to.

12 And the other thing is there is a limitation of

13 liability in the papers, in the agreement. Logistics Plus

14 wrote that, wrote that document. Logistics Plus drafted this

15 bill of lading. The same bill of lading that says that the

16 carrier's tariff is subject to the carrier's tariff, we didn't

17 write it, they wrote it. You're supposed to read what you

18 wrote, you're supposed to know what you write. So they should

19 have known when they wrote that, that they were binding the

20 shipper to this limitation of liability. This is an

21 international company with hundreds of employees. This is not

22 a mom and pop shop. So they should have known what they were

23 doing. So that's number two.

24 The last thing with respect to this freight damage,

25 it gets into more of the physical, we're moving away from the

1 paper trail, it gets into the physical. Accu-Spec does have to
2 establish that Central Transport got the freight in good
3 condition, just as counsel testified, and that it came out the
4 other end in bad condition, and their damages. To get money
5 from anybody, whether it be Central Transport or Logistics
6 Plus. I told you why Central Transport will not be found
7 liable for dollars here, why we believe.

8 But with respect to Logistics Plus or Central
9 Transport, there's going to be no one testifying, the forklift
10 driver who put it in the back of the trailer in California is
11 not coming to testify. The forklift driver who pulled it off
12 the trailer in Erie is not testifying. The person who packaged
13 the crate, I believe that is the person we have on Tuesday
14 didn't pack the crate, I think he only saw the machine three or
15 four days before it went into the crate. What happened, what
16 happened the next couple of days. What happened when the
17 forklift driver put it into the back of the truck.

18 So there will be testimony about this, they're going
19 to have to meet their burden with respect to that. If they do,

20 if you're convinced it went into the truck in good condition,
21 the one in California, it was switched once, I don't know about
22 more than once, different trailers, the truck drivers didn't
23 come all the way across the country, and it came out of that
24 other trailer in bad condition and they proved their damages,
25 okay, they jumped over a couple hurdles, now it's time to face

63

1 the other issues I've discussed. The misrepresentation, either
2 careless or intentional, doesn't have to be intentional, it
3 could just be careless, with regards to that classification.
4 Now, there's a limitation of liability. Testifying on behalf
5 of Central Transport will be, of course, George Horetsky. He's
6 a very important witness because of the central nature of this
7 classification.

8 And there's a person by the name of Jeff Cackowski.
9 He's going to come in to testify about how all these papers
10 work together. It's not simple to a lay person how they work.
11 You got one document incorporating another document, okay. So
12 he's going to explain how that all works. How the contract
13 works really.

14 And the third person to testify, we actually have
15 the truck driver, who dropped off the freight here in
16 Pennsylvania. His name is Dale Meabon. He'll testify about --
17 well, about what he saw, what he did. He's going to testify
18 that he saw the freight come off the trailer here and that
19 there was, the crate was dinged. He's going to testify to
20 that. He's also going to testify that it looked like the
21 freight shifted within the box. I don't know about all this
22 snug as a bug kind of testimony. There is this thing in a box,
23 it moved. It's two tons. You got to pack something that is
24 two tons pretty darn good to make sure it doesn't move. You're
25 putting it on the back of a truck. It's driving around this

64

1 country. If you just brace it on the bottom, it might not work
2 out. I think that is how this one was braced, inside the box
3 with bracing. You could brace it around the top, you could
4 brace it around the bottom. My understanding is that it was
5 braced only around the bottom.

6 There's also a little device on these boxes called
7 tip and tell. Cute little name for a thing you put on a box, a

8 crate, and if it tips, it makes like a mark in ink, like
9 mercury, whatever, sticks. So you can tell, look here, this
10 thing was flipped over, you can tell the ink is up here. This
11 tip and tell was not activated. So it's possible that this
12 freight shifted within the box because it wasn't packaged
13 properly and that the crate actually wasn't tilted or tipped,
14 that's speculation. You're going to have to determine this
15 from listening to these witnesses. So there's all these issues
16 you're going to have to think about, you got a lot to do, I
17 want to let you get to it. We'll try to be as efficient as
18 possible and as quick as possible. Thank you very much for
19 your time.

20 THE COURT: Members of the jury, before we hear from
21 Mr. Knox, you've been here quite some time now since you came
22 back from lunch, we're going to take a short recess -- and
23 we'll resume in about five minutes.

24 (Recess from 2:40 p.m.; until 2:52 p.m.)

25 THE COURT: All right, Mr. Knox.

1 MR. KNOX: Thank you, judge, may it please the

2 court. Ladies and gentlemen of the jury, good afternoon. My
3 name is John Knox and I represent Logistics Plus. We are a
4 logistics company, as has been pointed out. What that means is
5 we're in the shipping business, we're in the trucking business.
6 However, we don't have any trucks.

7 What we do and what we did in this particular
8 instance is that we're contacted by a customer like Accu-Spec
9 to get a good price. It's been alluded to that people like
10 Accu-Spec will contact trucking companies directly. If they
11 choose not to, they choose to go with us because we have a
12 number of contacts in the trucking industry. We call some
13 people, we get a good price, customers are pleased.

14 We're a local company, we're a growing company.
15 We were founded by a gentleman by the name of Jim Berlin, who
16 is here today, along with an officer of the corporation, Mr.
17 Mike Reilly.

18 Mr. Berlin is a guy with an interesting background,
19 with broad experience in the shipping industry. He's worked as
20 a truck driver. He's worked as a forklift driver, before
21 staking his claim and creating this company, which is now
22 located here in Erie.

23 In this case you're going to hear testimony and
24 evidence from a number of people. But first you're going to
25 hear about a gentleman by the name of Jim Mullen. Now, Mr.

66

1 Mullen, as the lawyers indicated, he is the gentleman who has
2 dealt with Logistics Plus on a number of occasions in the past.
3 Incidentally, he also happens to have a son-in-law who works
4 for Logistics Plus. And you're going to hear evidence and
5 testimony that he initially contacts Mr. Fanzini, a person at
6 Logistics Plus, and says to him, hey, I've got a crate, it's in
7 California, I need to get you guys to ship it for me, can you
8 get me a good rate. That's the extent of the transaction.
9 Mr. Fanzini says let me see what I can do. He then
10 surveys a number of the carriers out there in the United States
11 and he comes across Central Transport, one of the defendants in
12 this case, located in Michigan. He talks with, Mr. Fanzini
13 that is, talks with a gentleman by the name of George Horetsky
14 at Central Transport. He says hey, I got a guy back in McKean
15 who wants to ship a crate from California to McKean, can you
16 get us a quote. It weighs 5,280 pounds, what can you do.

17 There's an initial quote given, they kind of go
18 back and forth. That information is relayed back to Accu-Spec.
19 Accu-Spec says can you do a better deal, can you get us a
20 better quote. Mr. Fanzini, per that direction from Accu-Spec,
21 goes back to Central Transport, talks to Mr. Horetsky.
22 Mr. Horetsky then suggests, tell you what, why don't
23 we do this, why don't we ship it at Class 50. Great, I think I
24 can sell that. Goes back to Accu-Spec. Accu-Spec is pleased,
25 let's do that. We'll ship it at Class 50, one crate from

67

1 California, 590 bucks. That's it.
2 At that point Logistics Plus, this is one of the key
3 points of this case, Logistics Plus takes that information,
4 whose source is only from Accu-Spec, one crate, 5,280 pounds,
5 Class 50. And they put it on that document that Mr. Cohen
6 showed you, a bill of lading. It is essentially the contract.
7 Where did we get that information. Where does a
8 company like Logistics Plus, that doesn't own trucks, that
9 doesn't touch the freight, doesn't smell the freight, doesn't
10 handle the freight, where do we get the information on

11 particular shipments. We get it from our customer, we get it
12 from Accu-Spec. That's all they told us. Nothing about an
13 X-ray machine. Nothing about a fragile X-ray machine, nothing
14 about an X-ray machine that cost more than my first house,
15 \$120,000. That is not mentioned. That's important.

16 Now, after the bill of lading is drawn up, Central
17 Transport then takes its truck, goes out to California and
18 picks up the crate. The crate is loaded onto Central
19 Transport's truck, they drive all the way back to Pennsylvania.

20 We don't know really what happened at that point.
21 Again, Logistics Plus isn't handling the freight, we're not
22 touching the freight, we're not doing anything with the
23 freight. Central Transport, the trucking company, the carrier,
24 is carrying the freight across country. What happens during
25 that period of time, I don't know. That is one of the issues,

68

1 obviously, that we need to sort out. What I do know is we
2 weren't there.

3 At that point the freight eventually arrives in
4 McKean. They open it up, they see, number one, the crate is

5 damaged, then they open it up and see what's inside is also

6 damaged. And what's inside, surprise, surprise, is this large,
7 expensive industrial X-ray machine that is worth \$120,000.

8 Well, everybody agrees that the machine is damaged.

9 I don't think anybody disagrees with that. What is the issue,
10 though, is what caused that damage.

11 Now, you're going to hear a lot of evidence and
12 testimony. And that's really going to be your chief decision
13 here, what caused this damage, among other issues. Was it some
14 type of act on the part of the shipper, Dage, out in California
15 when they packed it. Was it some part of what Accu-Spec failed
16 to tell us about what this was. They told us it was a crate,
17 5,280 pounds, that's it. Does their failure cause this whole
18 problem, to tell us exactly what we're shipping.

19 You're going to hear testimony from Mr. Berlin,
20 again, the CEO, who will say well, if they told us that it was
21 an X-ray machine that was worth \$120,000, I don't think we
22 would have had it shipped at the cut rate, Class 50 rate. We
23 probably would have put it in some type of other truck, some
24 type of dedicated truck, bubble wrap that thing, make sure it
25 was as snug as a bug. That it's the only crate going. That

1 was not done here. Why, because Accu-Spec did not give us any
2 information, other than one crate.

3 Now, according to paragraph 12 of the plaintiff's
4 complaint, and this is the document that starts the lawsuit
5 that brings us all together here, they allege -- let's put this
6 up for you to look at. In paragraph 12 the plaintiff,
7 Accu-Spec, alleges "after a reasonable investigation, Accu-Spec
8 believes that Logistics Plus should have identified the X-ray
9 machine as Class 100 cargo, meaning cargo which was fragile and
10 needed to be transported with a higher degree of care than
11 metal castings require." That's what they allege. Two
12 problems, though.

13 Number one, again, they never told us that it was an
14 X-ray machine, let alone a fragile X-ray machine, let alone an
15 expensive X-ray machine, how would we know whether to class it
16 one way or the other. We class it as a crate, that's what they
17 told us.

18 Number two, the second problem is, you're going to
19 hear nothing from any of the witnesses here that will testify
20 that this Class 50, Class 100 designation, plays any role

21 whatsoever in the duty of care, in terms of how somebody
22 handles it. Mr. Cohen alluded to the fact that well, we could
23 have had a better deal, maybe they save a few hundred bucks
24 when they ship at Class 100 versus Class 50. That's
25 irrelevant, we're talking about damaged freight here. Does

70

1 that misclassification, if it was a misclassification, does
2 that play any role. Nobody is going to testify to that fact.

3 Now, Accu-Spec would have you believe that what
4 they've got to do here is come in and prove their case and that
5 proving their case is relatively simple. Accu-Spec's counsel,
6 Mr. Delaney has indicated, correctly so, that what they have to
7 prove is that the shipment, essentially, the freight was in
8 good condition at the point when it was going on to the truck
9 for Central Transport. Thereafter, it shows up at Accu-Spec
10 damaged and that they suffered damage, that's what they have to
11 prove. That's their part in this. I don't know if they can do
12 that, but if they do, that's not the end of the story. At that
13 point in the law we call that, that's at the point when the
14 burden shifts, the burden then shifts to Mr. Cohen, to myself,

15 Central Transport, to Logisitics Plus, to prove that we weren't
16 negligent.

17 I feel confident that the evidence will show that we
18 weren't negligent. Again, we don't touch this. We don't
19 handle the freight. The only thing that they're talking about
20 in terms of our negligence is we misclassified something. When
21 again, we don't know what it was, we're told it's a crate.

22 Beyond that, we also have to talk about an act of
23 the shipper. The shipper in this case again is Accu-Spec.
24 Mr. Cohen talked about this is a case about trust. I agree.
25 It really is a case about trust. Because we have to trust the

71

1 information from our customers. We don't see this freight.
2 They tell us what it is. We don't question it. We say okay,
3 this is your rate. Accu-Spec failed in that respect. The
4 shipper failed to give us the information about what it is,
5 about how much it is, about the fact that it's fragile,
6 nothing.

7 Ladies and gentlemen, I want to thank you in advance
8 for your gracious service here. I know this has probably not

9 been too exciting up until this moment in the case. We greatly
10 appreciate your time and service here. Some of you may think
11 that from watching television that Mr. Delaney, Mr. Cohen and I
12 spend every day in trial, we're constantly having all these
13 cases. And that's simply not the case. These are rare. These
14 are rare to go to trial. There are some statistics out there
15 that say that most claims settle 95 percent. This one didn't.
16 And it didn't because there are some very real and honest
17 disagreements on the facts and the law. It's obviously your
18 job to sort those out. So we're going to need you.

19 Lastly, I don't think this really is a case about,
20 just from our perspective, a crate. It's not about \$47,000 and
21 change. This is a very, very important case for us. This case
22 speaks to the very nature of how our growing company can
23 continue to do business. Again, how can we do business if we
24 cannot trust the information given to us by our customers,
25 Accu-Spec. One crate, 5,280 pounds, Class 50. That's all we

72

1 know.

2 If we can't trust our customers, the logical

3 alternative is for us to somehow now verify what they're
4 telling us. Again, we don't touch, we don't see, we don't
5 handle the freight. How are we going to verify the freight.
6 How are we going to verify the freight in this case out in
7 Fremont, California. We're back here in Erie. The answer is
8 we can't, it's impossible. We're shipping stuff all day long,
9 thousands of shipments a year. Don't let this case hold us
10 liable because that goes against the way we do business, how we
11 do business.

12 Now, Central Transport lastly is going to argue that
13 we somehow perpetrated fraud upon them. That's pretty funny.
14 They're in the business, they're trying to paint us as this
15 super expert, we're even smarter than them. Come on, they are
16 the big Kahuna here. They've been in the trucking industry
17 longer than anybody in this case.

18 They get our bill of lading, Class 50, one crate,
19 5,280 pounds. And then they find out after the fact that it's
20 an X-ray machine, hold on, there's fraud here. Think about
21 that. You're going to hear testimony from witnesses that are
22 going to talk about the fact that Mr. Horetsky gets this bill
23 of lading, gets this information. If he thinks it's so

24 important to know something more than just that it's a crate,

25 why doesn't he ask us. He doesn't. Why doesn't the truck

73

1 driver in California ask us. Well, is this thing I'm picking

2 up, is it a crate with an X-ray machine or is it a box of

3 bowling balls. Nobody says that here. Keep those points in

4 mind. Thank you for your time.

5 THE COURT: Mr. Delaney, call your first witness.

6 MR. DELANEY: Your Honor, we would call to the stand

7 Ernie Carlson, please.

8 THE COURT: All right, Mr. Carlson, come on up,

9 stand in front of the clerk, my deputy clerk will swear you in.

10 THE CLERK: Raise your right hand.

11 ERNEST CARLSON, PLAINTIFF WITNESS, SWORN

12 DIRECT EXAMINATION

13 BY MR. DELANEY:

14 Q. Mr. Carlson, could you tell us your full name and your

15 business address and your occupation?

16 A. Ernest D. Carlson, business address is Accu-Spec

17 Electronic Services, 8835 Walmer Drive, McKean, PA. I'm

18 president and partner in the business.

19 Q. How long have you been with Accu-Spec?

20 A. Since --

21 THE COURT: Mr. Carlson, sorry to interrupt you, see
22 that microphone in front of you, you're not making very good
23 use of it.

24 THE WITNESS: Okay.

25 THE COURT: Wait until I finish talking, too, the

74

1 court reporter has to get down everything that you say. Go
2 ahead.

3 THE WITNESS: Okay, since the inception in 1989.

4 BY MR. DELANEY:

5 Q. Are you one of the owners of Accu-Spec?

6 A. Yes, myself and two partners.

7 Q. Do you hold a position, such as an officer of Accu-Spec?

8 A. Yes.

9 Q. What position is that?

10 A. The president.

11 Q. How long have you been president?

12 A. For five years.

13 Q. Tell us a little bit about Accu-Spec; first of all, where

14 is it located?

15 A. McKean, Pennsylvania.

16 Q. Does it have any facilities outside of McKean?

17 A. No.

18 Q. How many employees today?

19 A. We've got about 188 employees.

20 Q. And what is the business of Accu-Spec?

21 A. We're a contract manufacturer. We basically build

22 printed circuit boards and cable assemblies for our customers.

23 We provide the expertise and equipment, to provide them with a

24 quality component.

25 Q. What types of customers, what kind of industries use the

75

1 products that you build for them?

2 A. Transportation, medical, which has really come along, the

3 industrial controls as well.

4 Q. Take us back to 2003, beginning of 2003, how many

5 employees at that point in time?

6 A. Approximately, 100.

7 Q. Same business?

8 A. Yes.

9 Q. Same location?

10 A. Yes.

11 Q. Now, were you involved in 2002 on behalf of Accu-Spec in

12 making a decision to acquire an industrial X-ray machine?

13 A. Yes.

14 Q. And tell us what was the purpose for this new equipment

15 that you wanted to buy?

16 A. It was going to enable us to provide another technology

17 level to our customer base. And, basically, to inspect and

18 process controls and BGA components in our industry.

19 Q. Okay. Prior to this decision being made, did Accu-Spec

20 have an X-ray machine?

21 A. No, we did not.

22 Q. What did you do to try to find one?

23 A. Myself and my operations manager, we made a trip to

24 Chicago in 2002. And there's a technology show, generally in

25 September, October, that they have every year, where different

1 manufacturers come in and demonstrate different equipment.

2 Might be an X-ray machine or it might be a pick and place

3 machine, it's truly a large show. We went up there and looked

4 at several different X-ray machines.

5 Q. Did you decide on one at that show?

6 A. We pretty much did. We looked at, like I said, several

7 other ones. And the Dage unit was just head and shoulders

8 above everybody else, just by the technology that they offered.

9 Q. Did they have people, Dage, did they have people at the

10 show you could talk to about their machines?

11 A. Yes.

12 Q. Did you cut a deal right then and there?

13 A. No, we did not, we wanted to think about it.

14 Q. Do you know where Dage is headquartered?

15 A. Their U.S. headquarters are out in California.

16 Q. Do you know where they build the machines?

17 A. In the UK.

18 Q. And when did you finally make a deal?

19 A. It was late December of that year.

20 Q. Do you remember what the initial quote was for an X-ray

21 machine from Dage?

22 A. Yes, \$135,000.

23 Q. Did you accept that price or did you negotiate?

24 A. We negotiated and made a deal at \$120,000.

25 Q. Okay. Did you have conversations with Dage about where

77

1 the machine would come from that you would receive, where it

2 was currently located?

3 A. It was at their facility in California.

4 Q. Did the people from Dage tell you what kind of use or

5 what kind of -- why it was in California, as opposed to the UK?

6 A. It was to demonstrate the capabilities of the machine to

7 potential customers.

8 Q. So this was a demo?

9 A. Yes.

10 Q. And, I'm sorry, I may have asked you this, what was the

11 price you ultimately agreed upon?

12 A. \$120,000.

13 Q. Do you know when you reached that agreement?

14 A. Late December of 2002.

15 Q. All right. Let me show you a document that we've marked

16 previously as Plaintiff's Exhibit No. 1, and I'll just ask you

17 if you recognize that document?

18 A. Yes.

19 Q. And what is that document?

20 A. It's an invoice from Dage.

21 Q. And what is it for?

22 A. The X-ray machine.

23 Q. The one that you purchased?

24 A. Yes.

25 Q. And what's the total amount to be paid?

78

1 A. \$120,000.

2 Q. Ultimately, did Accu-Spec pay that amount of money for
3 the machine to Dage?

4 A. Yes, we did.

5 Q. Thank you. Now, I want to show you some photographs, Mr.
6 Carlson. Can you see that, Mr. Carlson?

7 A. Yes.

8 Q. What is this Plaintiff's Exhibit 2, what does this
9 depict?

10 A. This depicts the machine as it is today in our facility.

11 It's the machine on the right-hand side that says Dage.

12 Q. Is this your facility in McKean?

13 A. Yes.

14 Q. When were these pictures taken?

15 A. Just this past week.

16 Q. Okay. And let me just see if I can move in a bit. Is

17 this area of the picture with the gentleman with his back to

18 the camera, is that the area of the picture that shows the

19 machine that you purchased?

20 A. Yes, it is.

21 Q. I'm going to show you now what we previously marked as

22 Plaintiff's Exhibit No. 3 -- and ask you if you could tell us

23 what that depicts?

24 A. That's a closer shot of the Dage X-ray machine.

25 Q. Who is that gentleman standing next to it?

1 A. He's one of our quality supervisors by the name of Rob

2 Freitas.

3 Q. Could you tell us, if you know, what the dimensions of

4 this piece of equipment is?

5 A. It's approximately a six-foot cube.

6 Q. All right. Now, at the front of the -- if I could find a

7 pen here, on this picture there appears to be something like a

8 computer screen right here, what is that?

9 A. That's the actual screen where the operator can view the

10 actual X-ray.

11 Q. And what is this opening located next to the screen?

12 A. That's where they place the sample.

13 Q. Is it a closed compartment into which they place a

14 sample?

15 A. The door there you can see the chrome handle, there's an

16 interlock on it, you open it, place the sample in and close the

17 door then.

18 Q. All right. This area about waist high or perhaps lower

19 than waist high, it appears there's a keyboard on that area, is

20 that right?

21 A. Yes.

22 Q. Is that a shelf that's detachable or is it something that

23 is built right on to the X-ray equipment?

24 A. It's permanently attached to the machine.

25 Q. Okay. Let's take a look at another photograph,

80

1 Exhibit No. 4, there's that same young gentleman; and what
2 does this depict?

3 A. The machine from a different angle, so you can get an
4 idea of the depth.

5 THE COURT: Sir, your voice is trailing off.

6 THE WITNESS: Sorry.

7 THE COURT: That's okay, just keep it up. Go ahead.

8 BY MR. DELANEY:

9 Q. This is the shelf that we referred to before?

10 A. Yes.

11 Q. The screen in the window?

12 A. Yes.

13 Q. Is this thing on casters, by the way, or is it on legs?

14 A. It's on casters right now.

15 Q. When it arrived, do you remember if it was on casters or
16 legs at that point?

17 A. I believe it was on casters.

18 Q. All right. Let me show you what's been marked as

19 Exhibit 5, what is Exhibit 5 depicting?

20 A. That's the inside of the machine, that's a rear view,

21 there's two large door that open up for service and so forth.

22 Q. Are there any movable parts in this piece of equipment,

23 Mr. Carlson?

24 A. Yes, there are.

25 Q. What are they?

81

1 A. There's a table and a camera, the best that I can

2 recollect, that do move within the machine.

3 Q. If we were to look at the front of the machine, are those

4 on the interior or the exterior of the body of the machine?

5 A. They're on the interior of the machine.

6 Q. All right. I'm going to show you another picture that

7 we've marked as Exhibit 6, I'll zoom out a bit here -- what

8 does this depict?

9 A. It's another view of the inside of the machine.

10 Q. The same as the last photograph we had?

11 A. Just a different angle.

12 Q. But from the rear?

13 A. Yes.

14 Q. Okay. Exhibit 7, what does this picture depict?

15 A. The operator's actually evaluating a printout circuit

16 board that is displayed on the screen.

17 Q. And, finally, let me see if I can bring this in a bit,

18 Exhibit 7 -- I'm sorry, this is Exhibit 8, what does this

19 depict?

20 A. That is actually the BGA component that we spoke about

21 earlier. Each one of the dots within that square have a solder

22 joint that is in between the component and printed circuit

23 board, which cannot be examined by any other means other than

24 an X-ray.

25 Q. Thus the purpose for this piece of equipment?

82

1 A. Yes.

2 MR. DELANEY: Your Honor, I would at this point move

3 for the admission of Exhibits 1 through 8.

4 THE COURT: Any objection?

5 MR. COHEN: No, your Honor.

6 MR. KNOX: No, your Honor.

7 THE COURT: They're admitted.

8 BY MR. DELANEY:

9 Q. Do you know the size and weight of this piece of

10 equipment?

11 A. Yes, it's 5,200 pounds, approximately, and a six-foot

12 cube.

13 Q. All right. When you reached an agreement with Dage, what

14 was the arrangement for getting the equipment from California

15 to Pennsylvania?

16 A. We were to select our own carrier and pay for that

17 carrier as well.

18 Q. What did you do, did you have any direct involvement in

19 that transportation issue?

20 A. No, we had a project manager, Jim Mullen, who I had asked

21 to make arrangements for the transportation of the machine to

22 McKean.

23 Q. Is this the kind of shipping that Accu-Spec does on any

24 frequent basis, shipping machines of this sort?

25 A. No, it's not. Typically, a shipment for us or even our

1 receiving is probably less than a 20-pound box.

2 Q. Did you have any further involvement with Mr. Mullen in
3 setting up the shipment of this particular piece of equipment?

4 A. Not in the actual shipment, but in the receipt thereof.

5 Q. In what way?

6 A. We wanted to make arrangements to have a rigger on hand
7 to load the machine off the truck and bring it into our
8 building. Even though we do have a forklift that was probably
9 capable of handling the equipment, we weren't comfortable in
10 doing it ourselves and we hired professionals to do this.

11 Q. Did you know that Mr. Mullen was going to contact
12 Logistics Plus to try to arrange this shipment?

13 A. Yes.

14 Q. Had you dealt with Logistics Plus prior to this
15 transaction?

16 A. I know that we have, but personally, no.

17 Q. Did you give any instructions to Mr. Mullen that he
18 should find the cheapest rate possible to get the equipment to
19 Pennsylvania?

20 A. No.

21 MR. KNOX: Excuse me, your Honor, sorry to
22 interrupt, may we approach.

23 THE COURT: All right.

24 (At side bar on the record.)

25 THE COURT: Go ahead.

84

1 MR. KNOX: I'm wondering if it is appropriate to

2 perhaps sequester Mr. Mullen, if in fact that is Mr. Mullen.

3 THE COURT: Who's that in the back of the courtroom?

4 MR. DELANEY: Mr. Mullen.

5 THE COURT: Is he going to testify?

6 MR. DELANEY: He is. He's already heard half the

7 testimony.

8 THE COURT: I'll sequester him. So I don't have to

9 tell him to leave in front of the jury, go back and tell him.

10 (End of discussion at side bar.)

11 BY MR. DELANEY:

12 Q. Did you provide Mr. Mullen or give any instruction to Mr.

13 Mullen about getting the cheapest possible rate for

14 transportation of this piece of equipment?

15 A. No.

16 Q. Was price an issue for you in the transportation of this

17 piece of equipment?

18 A. No.

19 Q. Now, were you present when the equipment arrived at

20 Accu-Spec's facility?

21 A. Yes.

22 Q. Do you remember the date?

23 A. February 14th.

24 Q. Of 2003?

25 A. Yes.

85

1 Q. Prior to that date, were you aware that Central Transport

2 was even involved in the shipment?

3 A. No.

4 Q. To your knowledge, was there any documentation that was

5 given to Accu-Spec by Logistics about the shipment?

6 A. No.

7 Q. This piece of equipment, did you have a loading dock onto

8 which the equipment could be placed from the truck; how was it

9 going to be unloaded?

10 A. We were going to have Rog's Riggers unload the equipment

11 from the trailer on to the parking lot. There's an overhead
12 door in close proximity to where the machine was going to be
13 located within our facility.

14 Q. So you were going to put it right on the ground?

15 A. Yes.

16 Q. Is it a box trailer or a flatbed that shows up?

17 A. It's a box trailer.

18 Q. Is there anyone else present with you when the truck
19 arrives?

20 A. Jim Mullen and the gentleman from Rog's.

21 Q. When you come out, Mr. Carlson, are the doors to the
22 truck opened or you there when they open them, what do you
23 recall about that?

24 A. I can't recall exactly when the doors were opened, but I
25 did see the container on the bed of the trailer.

1 Q. How large is the container relative to the back of that
2 trailer?

3 A. It was centered on the rear of the trailer in the back,
4 and took up a very large portion of the trailer.

5 Q. On that backside -- and I guess we need to establish

6 this, can you see the equipment or is it in a crate?

7 A. It's in a crate.

8 Q. On the backside of that crate that's visible to you as

9 you stand on the ground, did you see anything that would cause

10 any concern?

11 A. No.

12 Q. See any damage to the crate?

13 A. We saw something that was questionable on the side.

14 Q. Not on the back panel?

15 A. Not on the back panel.

16 Q. Now, when you say you saw something that was

17 questionable, what do you mean?

18 A. There appeared to be a mark or something up high on the

19 crate. And we couldn't really see what it was because it was

20 in the space of the restraints.

21 Q. I'm going to show you a picture that is marked

22 Plaintiff's Exhibit No. 9, and ask you if that picture is

23 familiar to you?

24 A. Yes, it is.

25 Q. Do you know about when it was taken?

1 A. That day.

2 Q. Okay. What does that picture depict?

3 A. The mark that we saw on the side of the crate.

4 Q. Is this the crate that contained the X-ray machine?

5 A. Yes, it is.

6 Q. If you could, first of all, let me point out, is this the

7 mark you're referring to?

8 A. Yes, it is.

9 Q. And when you first saw it on the truck, could you tell

10 what that mark was?

11 A. No.

12 THE COURT: Mr. Delaney, I'm sorry to interrupt, but

13 for purposes of the record, that will be inadequate to

14 establish what you're talking about, unless there is some

15 further description.

16 BY MR. DELANEY:

17 Q. What the judge means, Mr. Carlson, is I didn't describe

18 what we were talking about. On this Exhibit 9, do you see the

19 corner of the crate that is oh, a little bit to the right-hand

20 side of the total picture?

21 A. Yes.

22 Q. And do we see the sky above the top of the crate?

23 A. Yes, we do.

24 Q. Do you see that there appears to be the head of a metal

25 bolt at the edge of the crate near its top?

88

1 A. Yes.

2 Q. And the mark that you and I have been talking about, is

3 that a mark that's just to the left of that bolt?

4 A. Yes, it is.

5 Q. I forgot where I was. When it was in the truck, could

6 you tell what that mark was?

7 A. No, we could not.

8 Q. Did the rigger then bring the forklift and move the crate

9 off the truck?

10 A. Yes.

11 Q. In doing that did you see any damage caused by the

12 rigger?

13 A. No.

14 Q. When he gets the crate on to the ground, can you see that

15 same mark that we just looked at on Exhibit 9?

16 A. Yes.

17 Q. And can you tell what it is once you see it on the

18 ground?

19 A. Yes.

20 Q. What is it?

21 A. It's a puncture to the crate.

22 Q. Okay. That's near the top of the crate, is it not?

23 A. Yes.

24 Q. All right. Once you get this crate on the ground, do you

25 look at the crate for purposes of trying to inspect for other

89

1 damage?

2 A. Yes.

3 Q. And do you find anything?

4 A. Yes.

5 Q. Now, tell us, first of all, where you would have found

6 damage?

7 A. We found damage on the side that was furthestmost into the

8 trailer. That was where the shelf had pushed the container

9 outward and caused a bulge in fracturing of the container.

10 Q. Am I correct, if we take the side that you can see when

11 the tractor-trailer doors are open as the backside, am I right?

12 A. Right.

13 Q. Where on the crate is the damage?

14 A. The front side.

15 Q. All right. I'm going to show you what we marked as

16 Plaintiff's Exhibit No. 10, and is that a photograph that is

17 familiar to you?

18 A. Yes, it is.

19 Q. When was that photograph taken?

20 A. That same day.

21 Q. On the 14th of February?

22 A. Yes.

23 Q. And did you take this photograph?

24 A. I don't think so.

25 Q. Do you know who took it?

1 A. Probably -- I could probably narrow it down to one or two

2 people.

3 Q. Somebody from Accu-Spec?

4 A. Yes.

5 Q. This particular photograph, what is it depicting?

6 A. The damage to the crate.

7 Q. On what we have described as what side?

8 A. The front side.

9 Q. Now, let's just describe it for the written record. Is

10 this particular photograph showing a portion of what is

11 described as the front side of the crate?

12 A. Yes, it is.

13 Q. The crate is sitting on the ground, I presume, at this

14 point?

15 A. Yes, it is.

16 Q. And the top of the picture does not depict the top of the

17 crate, does it?

18 A. No, it does not.

19 Q. But let me compare the two pictures so just we get our

20 bearings here. I want to take you back, having looked at this

21 damage, take you back and show you Exhibit 4, that is the

22 equipment today. Would the crack in the wall of the crate be

23 consistent with this front, that is where the computer screen

24 is on the equipment?

25 A. Yes, it is.

91

1 Q. Does the crack correspond with a particular portion of

2 the X-ray machine?

3 A. Yes, it does.

4 Q. And where does it correspond?

5 A. The edge right near the keyboard.

6 Q. That would be the edge on Exhibit No. 4, the edge of the

7 shelf near the keyboard?

8 A. Yes.

9 Q. So let me put Exhibit 10 back on. We look again at the

10 photograph that is Exhibit 10, could you see inside the crate

11 through that crack?

12 A. Yes.

13 Q. All right. Now, did you notice any other portions of

14 that front panel -- let me withdraw that. The crack is this,

15 am I correct, the crack is this very dark jagged sort of

16 impression towards the left-hand side of that panel?

17 A. Yes.

- 18 Q. Is the strut or that -- that may be a four-by-four
19 actually, brace on the face of that portion of the panel, is it
20 also broken?
- 21 A. Yes.
- 22 Q. Is this crack demonstrating where that is broken?
- 23 A. Yes.
- 24 Q. I'm not sure this image is very good on the screen, is
25 that whole panel bulging out?

92

- 1 A. Yes.
- 2 Q. Let me take this away. I'm going to show you Plaintiff's
3 Exhibit No. 11, and ask you if this is a photograph with which
4 you're familiar?
- 5 A. Yes, it is.
- 6 Q. What does that photograph depict?
- 7 A. The side of the crate on that date with some damage to
8 the bottom side.
- 9 Q. I should ask you what date was this picture taken?
- 10 A. 2/14/2003.
- 11 Q. Does this picture depict the side of the crate where we

12 saw the crack or the bulging?

13 A. No, it does not.

14 Q. What side of the crate is this?

15 A. This would be the same side that had the puncture up

16 high.

17 Q. Okay. And what are we looking at here, what are you

18 seeing in terms of any damage to the crate here?

19 A. There was a wooden strip that ran along the bottom edge

20 of the crate, approximately half of that was missing, as well

21 as damage to the plywood.

22 Q. And, again, this is depicting the crate on the ground?

23 A. Yes.

24 Q. What is this blade that seems to be running parallel with

25 the edge of the crate?

1 A. That's a fork from the forklift that the riggers had

2 brought on site.

3 Q. Let me show you what is now Exhibit 12, can you see that,

4 Mr. Carlson?

5 A. Yes, I can.

6 Q. What is this depicting -- first of all, do you know the
7 date on which this photograph was taken?

8 A. 2/14/2003.

9 Q. And do you know where it was taken?

10 A. At Accu-Spec.

11 Q. Do you know what it depicts?

12 A. Yes.

13 Q. Tell us?

14 A. That's the bottom of the skid.

15 Q. Okay. And this is the same crate in which the X-ray
16 equipment is located?

17 A. Yes.

18 Q. At the far end or upstage in this picture, but at the
19 bottom of the picture appears to be a piece of equipment, what
20 is that equipment?

21 A. That is the forklift.

22 Q. So this is the forklift that was holding the crate up in
23 the air?

24 A. Yes, it is.

25 Q. You're taking a picture of the underside of the crate?

1 A. Yes.

2 Q. Is there any damage depicted on this particular

3 photograph?

4 A. Yes, there is.

5 Q. Can you help us identify where that damage is?

6 A. About the middle of the picture on the left-hand side,

7 just above the fork.

8 Q. Are you speaking about this area?

9 A. Yes.

10 Q. All right. The bottom of this crate appears to have been

11 made from pieces of lumber, is that correct?

12 A. Yes.

13 Q. Is this particular piece broken?

14 A. Yes, it is.

15 Q. Now, at this point in time when you were taking these

16 photographs, have you opened the crate at all?

17 A. No, we haven't.

18 Q. Let's take a look at Exhibit 13. But before I do that,

19 let me ask you about how the crate is constructed. You spent

20 sometime in the parking lot, I presume, looking at this crate?

21 A. Yes.

22 Q. Could you see how the crate itself was constructed?

23 A. Yes.

24 Q. What type lumber, what size lumber, if you know?

25 A. There was a variety of 2 by 2's, 2 by 4's, large skid.

95

1 Q. Okay. How were the panels of the crate held together?

2 A. With screws and bolts.

3 Q. When you were trying to open the crate and took a look at

4 it, was that a difficult task?

5 A. No, it was not.

6 Q. What did you do?

7 A. Basically, undid the screws with a wrench and a

8 screwdriver and within a couple of minutes we had the panel

9 off.

10 Q. Was there any lock on the package?

11 A. No, there was not.

12 Q. Were there any shipping bands, those metal type bands

13 that might circle the crate that you'd have to cut through to

14 open it?

15 A. No.

16 Q. Was there any -- do you remember any signs don't open the
17 crate or anything of that sort?

18 A. No.

19 Q. So I take it that you did open the crate?

20 A. Yes, we did.

21 Q. All right. Let me show you what has been marked as

22 Exhibit 13, and ask you if that picture is familiar to you?

23 A. Yes, it is.

24 Q. Do you know when it was taken?

25 A. 2/14/2003.

96

1 Q. And where was it taken?

2 A. At Accu-Spec.

3 Q. And what does it depict?

4 A. It depicts the shelf on the opposite side of the
5 keyboard.

6 Q. Okay. And this would be the same shelf that we looked at
7 in Exhibit 4, is that right?

8 A. Yes.

9 Q. And does it also show where the crack is in the wall of

10 the crate?

11 A. Yes.

12 Q. Where is that?

13 A. If you look back at the very dark area, you can see some

14 white shining through.

15 Q. Would that be just about in the center of the photograph?

16 A. Yes.

17 Q. And that's a portion of the crack?

18 A. Yes.

19 Q. Mr. Carlson, this piece of equipment, I want to get a

20 sense of how substantial it is. We know it's 5,200 pounds,

21 5,280 pounds, what are the walls of it made of?

22 A. There's steel and then a lead shield on the inside of

23 that.

24 Q. And that shelf that we've looked at it, is that also made

25 of steel?

1 A. Yes, it is.

2 Q. Okay. Now, did you see damage that was in this Exhibit

3 13, damage to the very body of this X-ray machine?

4 A. Yes.

5 Q. And can you tell us where we would see that?

6 A. Right at the rear of the shelf where it attaches to the

7 machine.

8 Q. In this particular area (indicating)?

9 A. Yes.

10 Q. Did the shelf actually push in the body of the machine,

11 the steel body?

12 A. Yes.

13 Q. Okay. And this panel of the machine, I'm sorry, it

14 doesn't come up for some reason -- I'm going to bring this up

15 to you, Mr. Carlson, because I'm not getting a good image of

16 that on the screen. But I'm going to have you look at Exhibit

17 13, is there above the shelf, is there a strip of steel that

18 runs above the shelf so that you can see a seam between the

19 main body and the face of the machine?

20 A. Yes.

21 Q. Was that disturbed in any way when you opened the crate,

22 did you see it was altered in any way?

23 A. Yes.

24 Q. What do you see?

25 A. It is bent and, obviously, not the way it should have

98

1 been.

2 MR. DELANEY: Your Honor, I'm not getting a good

3 image because of the light, may I approach.

4 THE COURT: Yes.

5 MR. DELANEY: I apologize about that.

6 BY MR. DELANEY:

7 Q. Mr. Carlson, this next photograph, it's not a really good

8 image, this next one is 14, is it not, Exhibit 14 -- and is

9 this familiar to you?

10 A. Yes, it is.

11 Q. What does it -- first of all, do you know when this one

12 was taken?

13 A. Should have been that same day.

14 Q. What does it depict?

15 A. The damage to the opposite end of the shelf.

16 Q. If I'm standing in front of the shelf, is this, like I'm

17 an operator, is this the right-hand side or the left-hand side

18 of the shelf?

19 A. If you're facing the machine, it would be to your left.

20 Q. Thank you. And does this depict damage to the steel

21 components of the machine itself?

22 A. Yes.

23 Q. This area, is that an indentation, is that damage or was

24 that in the design of this?

25 A. No, that's damage.

99

1 Q. I'm not so sure it's depicted well in this image, this

2 area of the face, is it distorted as a result of -- is it

3 distorted or damaged?

4 A. Yes, it is.

5 Q. I'm going to show you Exhibit 15 and ask if that is

6 familiar to you?

7 A. Yes, it is.

8 Q. Do you know when that was taken?

9 A. I believe it was that day.

10 Q. The 14th of February?

11 A. Yes.

12 Q. Is this also a picture of the X-ray equipment that

13 arrived on that date?

14 A. Yes.

15 Q. Does this show damage?

16 A. Yes, it does.

17 Q. What is this particular black area with the circle in the

18 lower left-hand corner of the picture?

19 A. It's the operator's shelf.

20 Q. Okay. Is this depicting the damage that was done?

21 A. Yes.

22 Q. On both the shelf and the member that goes vertically

23 from the shelf?

24 A. Yes.

25 Q. Now, that's steel, is that right?

100

1 A. Yes.

2 Q. Okay. I'm going to show you quickly this picture, which

3 is Plaintiff's Exhibit 16, can you tell us if that's familiar

4 to you?

5 A. Yes, it is.

6 Q. When was it taken?

7 A. That same day, I believe.

8 Q. February 14th?

9 A. Yes.

10 Q. Is this a picture of the X-ray machine?

11 A. Yes.

12 Q. Do you know of what portion of the machine this is?

13 A. Right, this would be the bottom left, looking at it from
14 the front.

15 Q. All right, just to make sure -- let's go back to

16 Exhibit 4. Is that 16 depicting the front portion of the
17 machine, if you know?

18 A. Yes.

19 Q. And you think it's over on the left in this area?

20 A. Above the on and off switch, the yellow/red is the on and
21 off switch, it's directly below that.

22 Q. Is this the on and off switch right here (indicating)?

23 A. Yes, it is.

24 Q. Let's go back to Exhibit 16. Is this depicting some
25 damage?

1 A. Yes, it is.

2 Q. Tell us where that damage is?

3 A. Just to the left of the lifting strut.

4 Q. This is the lifting strut?

5 A. Yes.

6 Q. You're saying in this area (indicating)?

7 A. Yes.

8 Q. What's damaged?

9 A. It should be aligned, this obviously has been damaged.

10 Q. Thank you. Just a couple more. Exhibit 17, is that

11 picture familiar to you?

12 A. Yes, it is.

13 Q. Can you tell us when that was taken?

14 A. 2/14/2003.

15 Q. All right. And what does it depict?

16 A. Damage to the pallet.

17 Q. All right. This is, of course, the crate of the machine

18 that we're talking about, the X-ray machine?

19 A. Right.

20 Q. I'm going to show you two pictures, Mr. Carlson, 17 and

21 18 -- there's 18?

22 A. Okay.

23 Q. Let me ask you some questions about 18 first; is that

24 picture familiar to you?

25 A. Yes, it is.

102

1 Q. When was it taken?

2 A. Approximately 2/14/2003.

3 Q. And is it depicting the crate and equipment that arrived

4 from Dage?

5 A. Yes.

6 Q. And is 18 depicting damage as well?

7 A. Yes.

8 Q. What are 17 and 18 showing you?

9 A. They're showing that the machine actually penetrated the

10 pallet from the top down.

11 Q. From the floor. So we have a break out at the wall in

12 the front and a break through the floor as well?

13 A. Yes.

14 Q. All right.

15 MR. DELANEY: Your Honor, may I publish those two

16 pictures to the jury?

17 THE COURT: You may.

18 (Whereupon, Plaintiff's Exhibits 17 and 18 were

19 published for the Jury.)

20 THE COURT: Retrieve the photos, please.

21 MR. DELANEY: Thank you.

22 BY MR. DELANEY:

23 Q. When you first saw the damage to the crate, even before

24 these pictures were taken, what was the first thing you did?

25 A. I went in to get a camera.

103

1 Q. And when you come back out, is the Central Transport

2 trucker still there?

3 A. No, he's not.

4 Q. Do you actually see him going down the road?

5 A. Going down the road, yes.

6 Q. Okay. At that point had there been a receipt signed?

7 A. Yes.

8 Q. Had Jim Mullen signed the receipt?

9 A. Yes.

10 Q. What did you do as soon as you learned that the truck had

11 left and the receipt had been signed?

12 A. I told Jim to get on the phone with Logistics.

13 Q. So he called Logistics, to the best of your knowledge, he

14 called Logistics?

15 A. Yes.

16 Q. Do you know if anyone, either from Logistics or Central

17 Transport, came to Accu-Spec that day, February 14th, to

18 examine the crate and the machine?

19 A. Yes.

20 Q. Do you know who it was that came?

21 A. Yes, George --

22 Q. Horetsky?

23 A. Horetsky.

24 Q. Were you there when the inspection occurred?

25 A. I was present but I don't think I interacted with them.

1 Q. Do you know what happened to the crate and the machine

2 that day, in terms of whether it came to your plant, whether it

3 stayed in the parking lot or what happened to it?

4 A. It sat out in the parking lot, as well as the riggers,

5 until a truck returned from Central and the riggers then loaded

6 the machine back onto the truck.

7 Q. And do you know where they took it?

8 A. To Logistics warehouse.

9 Q. Do you know where that is?

10 A. I believe it's up off of Route 8 and 90.

11 Q. We didn't really clarify, did you open the crate and take

12 those pictures that we looked at while it was in the parking

13 lot or after it got to the Logistics warehouse, where were

14 those taken?

15 A. Most of those were taken in the parking lot. I think

16 there might have been one or two in there that may have been

17 taken at Logistics warehouse when the inspector came.

18 Q. Okay. So did you have to reassemble the crate in order

19 to put the machine back on to the Central Transport truck to

20 move it to Logistics warehouse?

21 A. Yes.

22 Q. Was that a difficult task?

23 A. No, it was not.

24 Q. All right. In addition to asking Jim to call Logistics,

25 did you make any effort or do you know if any effort was made

1 to talk with Dage on that same day, February 14th?

2 A. Yes, very quickly.

3 THE COURT: Keep your voice up, sir.

4 BY MR. DELANEY:

5 Q. Did you have any direct contact with Dage?

6 A. Yes.

7 Q. Okay. Did you think the machine was operable that day?

8 A. Did not know. It just appeared as sheet metal damage.

9 Q. Okay. What did the people from Dage tell you or advise
10 you with regard to operation of the machine?

11 A. They said do not operate the machine.

12 Q. And why?

13 A. Because the lead shielding may have been compromised.

14 Q. What would be the impact if you turned the machine on?

15 A. Potentially fatal dose of radiation.

16 Q. Did the Dage people say anything about how this could be
17 remedied or how it should be inspected or examined?

18 A. They suggested that they send an inspector from the UK to
19 McKean to inspect the machine.

20 Q. Ultimately, did you agree to follow the instructions from

21 Dage?

22 A. Yes, we did.

23 Q. Do you know how long that piece of equipment sat in the

24 Logistics Plus warehouse?

25 A. I know the inspector came in April, I think it was the

106

1 first, second week of April, so from February through that

2 portion of April.

3 Q. Did you get a substitute X-ray machine at all?

4 A. No, we did not.

5 Q. You paid for the machine, did you not?

6 A. Yes.

7 Q. Do you remember the name of the gentleman who came from

8 Dage?

9 A. Yes, Peter -- the last name is escaping me. Peter Dunn.

10 Q. Do you remember how long he was in Erie?

11 A. I believe it was only for two days.

12 Q. And where did he examine the machine?

13 A. At the Logistics warehouse.

14 Q. All right. I'm going to show you what we marked as
15 Plaintiff's Exhibit No. 19, and ask if that is a document with
16 which you are familiar?

17 A. Yes.

18 Q. Could you tell us what this is?

19 A. It's Peter Dunn's report.

20 Q. It is a one-page document?

21 A. Yes.

22 Q. It's addressed to whom?

23 A. Jim Mullen at Accu-Spec.

24 Q. What is it dated?

25 A. Let me find it here -- April 16, 2003.

107

1 Q. Okay. And I'm not going to have you go through this
2 whole report. What does Mr. Dunn advise Accu-Spec to do,
3 what's the last line of his letter?

4 A. "The best course of action would be to return the machine
5 complete to the UK for repair and tests."

6 Q. Did you make a decision at Accu-Spec to follow that piece
7 of advice?

8 A. Yes, we did.

9 Q. Do you know when the machine was sent to the UK?

10 A. Not precisely.

11 Q. I have some documents, some invoices I'll show you. Do

12 you know when it came -- I won't even ask you that yet. In the

13 process of talking with Dage, with talking with Central

14 Transport, did you file a claim with Central Transport and

15 Logistics with regard to this event and this damage?

16 A. Yes.

17 Q. Let me show you what we've marked as Plaintiff's Exhibit

18 No. 20, and ask you if you are familiar with that two-page

19 document?

20 A. Yes, I am.

21 Q. What is Exhibit 20?

22 A. Basically, it's a letter to Dage, PNC, Logistics Plus,

23 Central Transport, discussing the damages that were accorded to

24 the machine.

25 Q. Who wrote it?

1 A. Myself.

2 Q. You signed it on the second page?

3 A. Yes.

4 Q. In that letter -- you need a date on that letter, I'm

5 sorry?

6 A. Yes, 2/21/2003.

7 Q. So this is just a week after you've seen the damage?

8 A. Approximately, yes.

9 Q. Do you know what the cost of repair will be at that point

10 in time?

11 A. No, I do not.

12 Q. Do you have a number in there for the amount of damage?

13 A. I do not see anything.

14 Q. Okay. Now, did you think that you were going to get a

15 response from Central Transport and Logistics Plus with regard

16 to this letter?

17 A. Certainly hope to.

18 Q. Did they get back to you?

19 A. No.

20 Q. Did you ultimately inquire with Central Transport what

21 are you going to do about this?

22 A. Yes.

23 Q. What did they say to you?

24 A. Well, it wasn't myself, I had asked Jim Mullen what was

25 going on with the incident, and he contacted Central's claims

109

1 department and, basically, they said what case.

2 MR. COHEN: Your Honor, I'm going to object, we're

3 going to have Mr. Mullen testify, Mr. Mullen will be available

4 to testify, I believe that's hearsay.

5 THE COURT: Sustained.

6 MR. DELANEY: Thank you.

7 BY MR. DELANEY:

8 Q. Then did you subsequently receive a claim form from

9 Central Transport with regard to this incident?

10 A. Yes.

11 Q. Let me show you what is Exhibit 21 -- what is Exhibit 21?

12 A. It's a damage claim to Central Transport.

13 Q. Did you have Mr. Mullen fill out this damage claim?

14 A. Yes.

15 Q. And it's Central Transport's form, is it not?

16 A. Yes, it is.

17 Q. What's the date of this particular claim?

18 A. April 4, 2003.

19 Q. And does it relate to the X-ray machine?

20 A. Yes, it does.

21 Q. What amount did you claim at that point?

22 A. \$120,000, plus \$980 in the riggers fee.

23 Q. Because you didn't, I take it you didn't know what the

24 repair costs would be?

25 A. No, we did not.

110

1 Q. Now, did you ultimately get a response from Central

2 Transport with regard to that claim form?

3 A. Yes.

4 Q. Let me show you Exhibit 22, and ask you what that one

5 page document is?

6 A. It is Central Transport's response.

7 Q. And what's the date of that response?

8 A. April 23, 2003.

9 Q. So this would be about 19 days after the claim form is

10 dated, is that right?

11 A. Yes.

12 Q. And who signs it, by the way?

13 A. Jeff Cackowski.

14 Q. And he is, what title does the letter indicate?

15 A. Claims manager.

16 Q. Okay. And it's addressed to whom?

17 A. Mr. Jim Mullen.

18 Q. What does the first sentence of that letter say?

19 A. "We have conducted an investigation of your claim and
20 have found no liability on our part."

21 Q. And why don't you read that next two sentences, the
22 second paragraph?

23 A. "We hold a clear delivery receipt with no notation of any
24 discrepancy at time of delivery. We also have no record of any
25 discrepancy while this shipment while in our possession."

111

1 Q. So the clear receipt, would that be referring to the
2 receipt Jim Mullen signed while you were in getting the camera?

3 A. Yes.

4 Q. Is there any reference in this letter to the fact that

5 Central Transport's representative came out and saw the damage?

6 A. No.

7 Q. They say they did an investigation. To your knowledge,

8 did they interview any people at Accu-Spec about this incident?

9 A. No.

10 Q. Did you ever learn that Central Transport contacted any

11 people at Dage to investigate this incident?

12 MR. COHEN: Objection, leading, your Honor.

13 THE COURT: Overruled.

14 BY MR. DELANEY:

15 Q. Did it ever come your knowledge they ever contacted

16 Rog's, the rigger, about this damage?

17 A. Not to my knowledge.

18 Q. Now, how about Logistics Plus, did they ever respond --

19 A. No.

20 Q. In writing?

21 A. No.

22 Q. How about verbally?

23 A. I know we had verbal communication, nothing that had any

24 value to it.

25 Q. Let me show you what has been marked as Exhibit 23, this

1 is a package of documents, and I want you to take a moment and

2 look through them and tell us if you are familiar with them?

3 A. Yes, I am.

4 Q. What is Exhibit 23?

5 A. Computation of damages.

6 Q. Is that something that -- the attachments, are those

7 things that you provided to me to demonstrate the amount of

8 expense incurred by Accu-Spec for repair?

9 A. Yes.

10 MR. DELANEY: Your Honor, I'm going to move for the

11 admission of Exhibits 19 through 23 at this point.

12 THE COURT: They're admitted.

13 BY MR. DELANEY:

14 Q. Let's just put this on the screen, Mr. Carlson. The

15 package of documents, does it have an invoice from Rog's

16 Rigging?

17 A. Yes, it does.

18 Q. Did Accu-Spec pay that invoice?

19 A. Yes, we did.

20 Q. In terms of Mr. Dunn, he is the inspector from Dage?

21 A. Yes.

22 Q. What costs were incurred for his inspection?

23 A. Travel and lodging, meals.

24 Q. All right. Did Accu-Spec pay that?

25 A. Yes, we did.

113

1 Q. Repacking, this invoice from NNN Carting, is there an

2 invoice in the package for that?

3 A. Yes, there is.

4 Q. Did Accu-Spec pay that sum of money to NNN Carting?

5 A. Yes, we did.

6 Q. Shipping to England. Is there in invoice for shipping

7 the equipment to England?

8 A. Yes.

9 Q. And who do we pay for that, by the way?

10 A. Logistics Plus.

11 Q. All right. Did we pay it?

12 A. Yes, we did.

13 Q. The repair costs from Dage, \$36,312, is there an invoice

14 in the package for that?

15 A. Yes, there is.

16 Q. Did Accu-Spec pay that sum?

17 A. Yes, we did?

18 Q. The shipping back to the United States, \$3,924.55, did we

19 pay for that, did Accu-Spec pay for that shipping?

20 A. Yes, we did.

21 Q. And then U.S. Customs, are there invoices for Customs in

22 the package?

23 A. Yes, there are.

24 Q. And did Accu-Spec pay for those invoices or pay for those

25 Customs costs?

114

1 A. Yes, we did.

2 Q. What is the total amount then of Accuspec's claim?

3 A. \$47,521.84.

4 THE COURT: How much more direct do you have?

5 MR. DELANEY: One question.

6 THE COURT: All right.

7 BY MR. DELANEY:

8 Q. Why send the equipment back to the UK, why not

9 investigate having it done having it repaired in the United
10 States?

11 A. The equipment manufacturer, Dage, did not have facilities
12 here in the U.S. to perform that kind of repair and inspection.
13 To send it anyplace else, other than Dage, would have voided
14 our warranty with the machine. And the third issue was that if
15 the lead shield was compromised, we simply weren't going to put
16 our employees at risk of taking a fatal dose of radiation.

17 MR. DELANEY: That's all I have of this witness,
18 thank you, your Honor.

19 THE COURT: Mr. Cohen.

20 MR. COHEN: Thank you, your Honor.

21 CROSS-EXAMINATION

22 BY MR. COHEN:

23 Q. Good afternoon.

24 A. Good afternoon.

25 Q. You testified that you were one of a group that went to

1 Chicago to the trade show to investigate these types of X-ray
2 machines, correct?

3 A. Yes.

4 Q. Who went with you?

5 A. George Ballard, our operations manager.

6 Q. Anybody else?

7 A. No, that was it.

8 Q. And you said at the trade show you saw different

9 manufacturers of these X-ray machines, is that right?

10 A. Yes.

11 Q. Who were some of the other companies that manufactured

12 these X-ray machines?

13 A. One was Glenbrook Technologies.

14 Q. Where were they located?

15 A. I do not know offhand.

16 Q. Do they have a U.S. location?

17 A. Yes.

18 Q. And what was another company that you maybe looked at?

19 A. I don't recall at this time.

20 Q. Is this a trade show where there are booths sort of set

21 up?

22 A. Basically, different areas for different manufacturers.

23 Q. And do you remember who you spoke with at the Dage area

24 or booth?

25 A. Yes, I do.

116

1 Q. What was the name of that person?

2 A. Hal Hendrickson.

3 Q. Hal Hendrickson?

4 A. Yes, sir.

5 Q. What was Hal's title, did he have a title?

6 A. I believe he's the U.S. sales manager.

7 Q. Is Hal from England or from the U.S.?

8 A. He's a U.S. citizen, I believe.

9 Q. How much time did you spend with Hal at the trade show?

10 A. Probably an hour.

11 Q. Did they have a machine set up there?

12 A. Yes, they did.

13 Q. Was it an XL6500?

14 A. I believe it was.

15 Q. That's what the code of this one is, right?

16 A. Yes.

17 Q. Did he show you how it worked?

18 A. Oh, yes.

19 Q. When he operated this machine, you take a component, you
20 put it in the device, the door closes and then it X-rays the
21 piece of equipment in the box, is that how it works?

22 A. Basically, you open the door, you place your sample
23 inside of it and close the door and then you have to, somebody
24 has to program it to do what it's intended to do.

25 Q. How many times did you watch this particular machine do

117

1 its stuff at the trade show?

2 A. Probably two or three times.

3 Q. How many people were at the trade show?

4 A. I do not know.

5 Q. Ballpark it, over 50?

6 A. Oh, yeah.

7 Q. Over 500?

8 A. Probably.

9 Q. Do you know if the Dage booth was busy, if you will, were
10 people interested in this machine?

11 A. At the time we were there, we were the only ones in the

12 booth.

13 Q. At a certain point you said this is a gizmo we need to

14 make sure our operations are better, you wanted to improve your

15 operations, correct?

16 A. Yes.

17 Q. When did you decide you were going to buy the XL6500?

18 A. In December.

19 Q. In December, okay. When were you at the trade show?

20 A. I believe it was September or October.

21 Q. So when you decided you were going to buy the X-ray

22 machine, who did you call?

23 A. Hal Hendrickson.

24 Q. How did the conversation go with Hal?

25 A. Well, we asked for a quote.

118

1 Q. All right. Was it you on the phone or was it you and

2 somebody else?

3 A. I was on the phone with Hal.

4 Q. All right, you asked for a quote in December, and what

5 did Hal say?

6 A. He furnished me with a quote.

7 Q. How long did it take him to get you the quote?

8 A. I would imagine just a day or two, I do not precisely

9 recall.

10 Q. And what was the quote?

11 A. \$135,000.

12 Q. Did you tell Hal you needed the equipment within a

13 certain timeframe?

14 A. No.

15 Q. Were there certain things you wanted to use the equipment

16 for quickly?

17 A. We had potential for participating in a business that we

18 would utilize the machine, but we did not have an order so we

19 did not have a truly urgent nature.

20 Q. Okay. At a certain point Hal told you, listen, we have a

21 machine in California, it's a demo, how about that, do you want

22 that one, is that pretty much what he said?

23 A. Pretty much.

24 Q. And after that -- well, at that point, is that when he

25 said we'll give it to you for \$120,000?

1 A. He furnished us with a quote for that machine, yes.

2 Q. So the \$120,000 quote was for the demo machine in

3 California, correct?

4 A. Yes.

5 Q. And the original quote for a new machine from England was

6 \$135,000, correct?

7 A. Yes.

8 Q. So you got a \$15,000 discount for buying a demo, is that

9 fair to say?

10 A. Yes.

11 Q. Did you ask him how long the demo was in the, I'll call

12 it the showroom in California -- how long it was on the floor

13 in California?

14 A. I don't know if they actually used it in their facilities

15 in California, but used it for trade shows.

16 Q. Did you ask him, well, it's a pretty expensive purchase,

17 \$120,000, how many times did you ship this around the country,

18 the world, did you ask him that?

19 A. I believe that we did have a conversation about that.

20 Q. Did you learn the shipment history of this particular

21 machine?

22 A. Not precisely, no.

23 Q. If you can explain the details of the conversation you

24 did have regarding whether this machine went around to trade

25 shows?

120

1 A. I don't recall exactly what was stated in the

2 conversation, but I do recall that it didn't seem like it was

3 anything unusual as far as usage or being transported a lot.

4 Q. Did you inquire with Hal -- well, Hal, it's a demo

5 machine, how many times has it X-rayed things, how many times

6 has it been operating?

7 A. He said it was slightly, you know -- used for

8 demonstration. No production was done with the machine or

9 anything like that.

10 Q. So, just correct me if I'm wrong, you said you were told

11 that it was used for demonstrations at trade shows but not

12 necessarily for demonstrations in the California location of

13 Dage?

14 A. Not where it was physically sitting, that's what I seem

15 to remember.

16 Q. Is it possible that Hal told you that it was used for
17 demonstration purposes in the location in California?

18 A. It could have been.

19 Q. Did you ask him how old the machine was?

20 A. I believe I did.

21 Q. And how old did he tell you the machine was?

22 A. I think it was just months.

23 Q. Months. Were you concerned a new model might be coming
24 out that you might want to wait for the new model?

25 A. No.

121

1 Q. Now, you needed to get the machine from California to
2 your facility in Erie. Mr. Mullen was in charge of that,
3 right?

4 A. Yes.

5 Q. Mr. Mullen, your transportation coordinator?

6 A. He's the project manager.

7 Q. Is he the one who handles transportation issues at
8 Accu-Spec?

9 A. We don't regularly transport by truck.

10 Q. What do you usually transport by?

11 A. UPS.

12 Q. Does he handle those issues?

13 A. He was in charge of our shipping and receiving

14 department, overseeing some of the things that we had going on

15 back there.

16 Q. His responsibility was to get this thing from California

17 to Erie, correct?

18 A. Yes.

19 Q. Were you present for any conversations that he had with

20 Logistics Plus with respect to how it should be transported?

21 A. No.

22 Q. Aside from him telling you, do you know any of the

23 specific information that he conveyed to Logistics Plus about

24 how this thing was supposed to be transported?

25 A. No.

1 Q. Did you know if he told Logistics Plus the complexity and

2 value of this machine?

3 A. I do not know that.

4 Q. This is Plaintiff's Exhibit 1 -- there's a lot of

5 different pieces of this thing -- this was all in the box,

6 right?

7 A. Yes.

8 Q. The joggles board, the manipulator, the calibration

9 plate, the micro switch, all this good stuff, that was all in

10 the box?

11 A. Yes.

12 Q. Would you consider that a sophisticated piece of

13 equipment?

14 A. Yes.

15 Q. A high value piece of equipment?

16 A. Obviously.

17 Q. Do you have any experience with the packaging of this

18 type of freight?

19 A. No.

20 Q. So you've come to no conclusion as to whether or not

21 proper bracing of the two-ton machine was used to hold steady

22 the crate, is that correct?

23 A. It looked as if it should be sufficient.

24 Q. That's just based on your layman's knowledge of what you

25 saw that day, not any particular training, correct?

123

1 A. That's correct.

2 Q. Did you see any bracing inside the box at the top of the
3 machine?

4 A. I don't recall that.

5 Q. This is P-13. Do you see any bracing up here
6 (indicating)?

7 A. No, I do not.

8 Q. Do you see any bracing down here (indicating)?

9 A. No.

10 Q. You're saying that this is sheet metal, is that correct?

11 A. Yes.

12 Q. And this was pressed right up against the wall of the
13 crate, is that correct?

14 A. And bulged the crate, yes.

15 THE COURT: Mr. Cohen, my court reporter and I think
16 the jury is starting to run out of steam a little bit, we've
17 been going for probably close to an hour and 40 minutes, how
18 much more cross do you figure you have?

19 MR. COHEN: Not very much.

20 THE COURT: In terms of minutes how much more do you
21 have?

22 MR. COHEN: Ten minutes.

23 THE COURT: All right, push ahead. You'll either
24 finish or I'll let you finish tomorrow. Go ahead.

25 MR. COHEN: Thank you, your Honor.

124

1 BY MR. COHEN:

2 Q. You testified that when the freight was delivered, you
3 saw damage to the crate, you went inside to get the camera and
4 when you came back the trucker was gone, is that correct?

5 A. Yes.

6 Q. Did anyone tell the trucker to stay?

7 A. That was my point, yes.

8 Q. Who told the trucker to stay?

9 A. Nobody told him to stay, that was my point with Jim.

10 Q. So you were upset with Jim, Jim, why didn't you tell the
11 guy to stay, did you say that?

12 A. I asked where he was, yes.

13 Q. And what did Jim say?

14 A. He said he took off.

15 Q. Then you said, Jim, didn't you tell him to stick around?

16 A. Obviously, yes.

17 Q. So the truck driver had a signed delivery receipt, so he

18 left. He didn't take off, he left because he had delivered the

19 freight, is that right?

20 A. I was inside the building, so I really don't know what

21 transpired between him and Jim.

22 Q. Now, you testified also that a Central Transport truck

23 came back to pick this thing up and move it to Logistics Plus

24 warehouse, did you see the truck?

25 A. No, I did not.

125

1 Q. Are you sure it was a Central Transport truck?

2 A. I presume it was. Because I believe that George actually

3 made arrangements for the truck to pick the equipment up.

4 Q. You didn't see the truck?

5 A. I can't recall, no.

6 Q. Did you speak with George with regards to arrangements,

7 or how did you learn -- you're saying George made arrangements

8 to pick it up again, who told you that?

9 A. Jim.

10 Q. You didn't hear that yourself with own ears?

11 A. No.

12 MR. COHEN: Move to strike.

13 THE COURT: Overruled, you asked him the question,

14 you asked for the answer.

15 BY MR. COHEN:

16 Q. You testified that there was an engineer that was flown

17 in, Peter Dunn from England --

18 A. Yes.

19 Q. To look at this. Did Mr. Dunn in e-mail correspondence

20 indicate, before he even came over, that the machine should be

21 shipped back to England?

22 A. I think they said potentially it should be, if any

23 potential, if the lead shield was compromised. There is just

24 no way of guaranteeing that.

25 Q. He said it's Dage pretty much, if the lead shield is

1 compromised -- if there's potential for the lead shield being

2 comprised, it should go back to England, is that what Dunn

3 said?

4 A. Yes.

5 Q. Why didn't you send it back to England without spending

6 \$3,000 for Dunn to come and tell you that in person?

7 A. We had to assess the damage.

8 Q. Why couldn't it be done in England?

9 A. We wanted to get an estimate of what the damages were

10 going to be.

11 Q. If the estimate was too high, were you going to send it

12 to somewhere in the United States?

13 A. No, sir.

14 Q. What were you going to do with that information with

15 respect to whether it was done in England or whether it was

16 done in the United States?

17 A. We wanted to see exactly where we stood dollar wise.

18 Q. Could you have done that by just sending it to England

19 and having them send you a letter that said \$36,000?

20 A. Probably could have been done.

21 Q. Did you investigate any possibility of sending it to

22 another manufacturer of X-ray equipment in the United States

23 locally?

24 A. Absolutely not.

25 Q. You didn't look into it at all?

127

1 A. No.

2 MR. COHEN: Thank you for much for your patience,
3 your Honor, I have no further questions.

4 THE COURT: All right, very good. That's the end of
5 the road for today, members of the jury. It's been kind of a
6 long one. Let me remind you again, don't talk about the case.
7 Obviously, it's important that you keep an open mind until the
8 entire case is over and you get in the jury room, then you can
9 start deliberating. We're going to stand in recess then, I'm
10 going to ask that you be here -- who's from out of the county,
11 anybody -- where are you from?

12 A JUROR: Elk County. But I'm going to stay over.

13 THE COURT: Good. I don't feel so bad in telling
14 you folks to be here at 9 a.m. tomorrow, we're in recess until
15 then.

16

17 (Whereupon, at 4:25 p.m., the Jury Trial proceedings
18 were adjourned for the day.)
